

Test Results

Tool Search: Test Results

The **Test Results Report** lists student scores on selected assessments. State Tests, National Tests, and District Tests can be selected. Assessments with a specific subject type can be chosen, along with a specific score type and score result. Options are also available to include assessments the student has taken or not taken.

Tests available for selection are first created in the Test Detail section of the Assessment Center. Student assessments are listed on the Student Assessment tool. This report is also available for teachers in Campus Instruction as the Student Assessment Summary Report.

See the Student Information Reports Tool Rights article for the tool rights needed to generate this report.

The Test Results report looks for assessment records on the student's Assessments tool and reports them based on the selected options on the report.

This report is available in State Editions. For districts linked to a state edition:

- State tests must be created in State Edition and published to District Edition
- A State Code must be assigned to the test in State Edition

Districts that are not linked to State Edition must have a State Code assigned to the State Test.

Report Editor

Field	Description
Which students woul	d you like to include in the report?
Grade	Students are included in the report based on the selected grade level. Only grade levels included in the school selected in the Campus toolbar are listed.

Field	Description
Ad hoc Filter	Only students included in the selected filter print on the report when they meet other report logic.
Enrollment Effective Date	Indicates the date on which the student must be actively enrolled in order to be included in the report. Dates are entered in <i>mmddyy</i> format or can be entered by selecting the calendar icon to choose a date. This field pre-populates the current date.
Which tests would ye	ou like to include in the report?
The designation of an a Type assigned when cr	assessment being a State, National, or District Test is based on the Test eating the test in Test Detail.
State Tests	Defaults to 'All', but specific State Tests can be selected.
	An Appendix A page prints separately that shows which subjects were selected.
Subject	When adding assessments in Test Detail, a state test can be assigned a subject, but it is not required. The subjects marked in the report editor return test data related to the selected subjects. When 'No Subject' is selected, tests that are not assigned a Subject are included in the results.
	All subjects can be marked for inclusion in the report (Select All button). Use the 'Clear All' button to remove all selections. At least checkbox must be selected.
National Tests	Defaults to 'All', but specific National Tests can be selected.
District Tests	Defaults to 'All', but specific District Tests can be selected.
Test Score Date Range	Limits the tests included in the report to those within the entered From / To dates. The date applies to the date the student took the test, as noted in the Date field on the Student Assessment record.
Include all tests - Taken and Not Taken	 Includes every test where the student has taken the test (meaning a record exists for that test on the Student Assessment tool) and where the student has not taken the test (meaning there is no record for that test on the Student Assessment tool). The logic used for this is two-fold: First, a list of students who have taken the selected tests is found. Second, a list of tests that the students have not taken is found. When the students have not taken ANY of the tests, logic does not look to see which tests the students have not taken, which means the report does not list any of the tests when there is no record of the students taking any of the selected tests.

Field	Description
Include only tests that students have taken	Includes every test the student has taken (a record exists for that test on the Student Assessment page).
Include only tests that students have not taken	Includes every test the student has not taken (there is no record for that test on the Student Assessment page). Selecting this option removes the ability to choose Result and Score Types.
Which results would	you like to include in the report?
Test Result	 Choose the desired test result(s) to include on the report. Passed and Failed results are determined by the Passing Score checkbox on the Result Statuses section of Test Setup. Missing includes tests that have a result status Test Setup, but the student's test score does not have any results defined (only a score is available). Tests with no results defined includes any test that have no result statuses assigned. All of these options are automatically selected. Remove the checkmark from the option as desired. The selection of a Test Result is not necessary, but the selection of a Result Status is. The report finds student test results by the selected Test Result Status AND/OR the selection of a specific Result Status. Test Results are returned first, then Result selections are found. If there are no Result Statuses selected, all result statuses are listed on the report.
Result Status	Includes a list of all available result statuses assigned to any test. Choose the desired value associated to the test score to include on the report. The default option is 'All', but specific results can be chosen. This reports the result of the test, not the actual score the student received.
Which Score Type(s)	would you like to include in the report?

Field	Description
Score Type	Choose the desired score type(s) to include on the report.
	This option includes the score type attributes that are unhidden in the Attribute/Dictionary. If only the Scale Score type is selected, the report lists all selected tests, but only the tests that have a Scale Score have that score printed.
	The list of score types is not a filter to narrow results of a student's assessments.
Display Options	
Best Test Score Only	Reports the highest score the student has received when there are multiple scores for the same test.
Display Code	Prints the Code entered on the Test Information section of Test Detail in the Assessment Center.
Include tests' detail information	Additional information, including test score comments, about the test prints on the report,
Add a page break between students	A new page is reported for each student and the report header from the first page is displayed for each reported student.
Alternate row shading	Alternating rows on the report are slightly colored to make the report easier to read.
Sort Options	
Primary Sort	 Prints student test results by: Grade Level (lowest selected grade level prints first) Student Name (alphabetical by last name) Student Number (numeric in ascending order)
Secondary Sort	Indicates the second level of sorting on the report. Data returned can be sorted by: • Test Name • Test End Year • Sequence
Report Format and G	eneration Options
Report Format	Determines how the report generates: • PDF • CSV • DOCX

Field	Description
Report Generation	 Generate Report: Displays the results immediately in the selected format. Submit to Batch: Allows larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.

Generate the Report

- Select the students to include on the report by choosing either a Grade level or an Ad hoc Filter.
- 2. Enter the Enrollment Effective Date.
- 3. Select the **Type** of tests to include and the **Assessments** to include for each selected Test Type.
- 4. Enter a Test Score Date Range.
- 5. Select which tests to report those that have been taken and not taken, only those that have been taken, or only those that have not been taken.
- 6. Select the desired **Test Result(s)**.
- 7. Select the desired **Score Type(s)**.
- 8. Select the desired **Result Statuses.**
- 9. Select the desired **Display Options.**
- 10. Choose the desired **Primary and Secondary Sort Option**s.
- 11. Select the desired **Report Format.**
- 12. Click the Generate Report or Submit to Batch.

Test counts display in the header of the report. Note the following:

- The count of Tests Taken and Test Not Taken only counts parent tests.
- The count of Passed tests counts all tests with a passing result.
- The count of Failed tests counts all tests with a failing result.
- The count of Missing tests counts all tests that have a missing result value in Test Score, but the test has results defined.
- The count of Tests with no results defined counts all test that do not have results defined.

Separate counts for each student display with the student's name. Only Passed or Failed tests, and totals for each (includes parent tests, child tests, grand child tests) are listed.
