Report Logic

A student reports for each unique Course Section combination that qualifies the student to report.

The following logic applies to the EOC FALL Assessment:

- Reports students in grades 09-12 according to what is selected in the Extract editor.
- Assessment Subject must be defined on the Course editor.
- Assessment Type must be defined on the Course Section editor.
- The reported term must have an end date that is greater than or equal to the Effective Date entered on the extract editor.
- The reported term must have a start date that is less than or equal to the Effective Date entered on the extract editor.

Report Editor

Field	Description
Extract Type	Indicates the type of MOSIS Extract being generated. Choose Pre-code File .
Report Protected Identities	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.
Report State Excluded Students	When marked, students who meet the report population requirements but their enrollment record is marked as State Exclude report along with all other records. When not marked, students marked as State Exclude on their enrollment record are excluded from the report.

Ad hoc Filter	Selection of a filter limits the set of students to only those included in the filter.
Assessment Type	Determines the pre-code file that generates. Choose EOCFAL: EOC Fall
Select Grades	Indicates which grade levels are included in the extract. All grade levels can be selected, but the EOC Fall extract only reports data for students in grades 9-12.
Format	Determines the program used to display the report. State Format is in CSV - use this option when submitting data to the state. Use the other options or data review and testing - Tab Delimited, HTML, or XML.
Calendar Selection	Indicates from which enrollments are included in the extract. At least one calendar must be selected to generate the report. Calendars can be selected by active year, school name or year.

Field	Description
Report Generation	The report can be generated immediately using the Generate Extract button. When there is a larger amount of data chosen (several calendars, large date range, etc.), use the Submit to Batch button, which allows the user to choose when the report is generated. See the Batch Queue article for more information.
