Tool Search: District Assignments

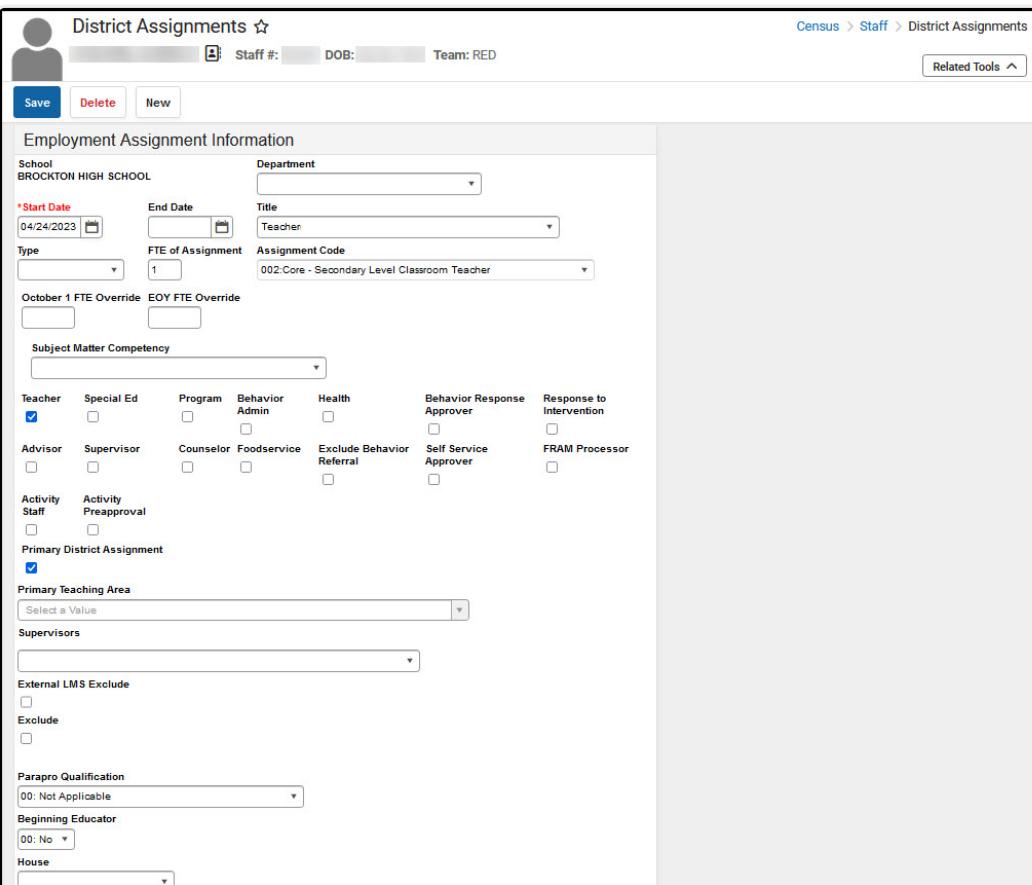

The District Assignments tool contains a series of checkboxes that determine, in addition to the appropriate tool rights, what access a user has to certain areas of the product. See the [Core District Assignments](#) article for more information.

This tool also contains fields that report data within SIF.

The following table defines what tools are affected when these checkboxes are selected (and what subsequent tool rights should be assigned).

These checkboxes are used by other areas of the product (e.g., [My Data](#), [Emergency Messenger](#), [Ad hoc Reporting](#)) to differentiate between types of staff members.

In addition to the selections made on the District Assignment tab, appropriate tool rights need to be assigned.
