Tool Search: VE-135 File

The VE-135 File is used to report demographic and program information about secondary and post-secondary CTE students for submission to the VE-135 database. Enrollment information is reported, as is follow-up information on CTE students, and may also include information on post-secondary students who have academic or undeclared majors.

Two extract types exist for reporting high school students (grades 7-12) or for reporting middle school students (grades 6-8).

VE-135 Extract

Read - Access and generate the VE-135 File.

Write - N/A

Add - N/A

Delete - N/A

For more information about Tool Rights and how they function, see the [Tool Rights](#) article.

Report Logic

One record per student CDE ID per program reports. If the State finds duplicate records for a student in the same program, the last record found in the submitted file is used, regardless of the completion code.

Vocational records associated with calendars in which a student has a partial enrollment are reported if other reporting conditions are met. This means that even though a student may have a partial enrollment in the selected calendar, that student may not report.

Student Vocational Education records are only pulled for the first year of the reporting school year (*i.e.*, a record in 2020 reports for the 2020-2021 school year).

Grade Levels

Grade levels must be mapped to State Grade Levels.

Students enrolled in grades 7 and 8 report in both the Middle School and High School format. When the MS CTE checkbox is marked on the Vocational Education record, the student reports only for the Middle School format.

Middle School

Students enrolled in State Grade Levels of 6-8 who have a [Vocational Education](#) record within the reporting school year AND the **MS CTE** checkbox marked on that Vocational Education record are included on the report.

One record per student per program per school reports.

- If the student was enrolled in three different middle school programs at one school, three unique records report.
- If the student was enrolled in two different programs at two different schools, two unique records report.
- If multiple records contain the same CDEID data and ProgramID, one record reports.

High School

Students enrolled in State Grade Levels 7-12 who have an active enrollment during the reporting period AND has an active [Vocational Education](#) record during the reporting period are included on the report.

Only one record reports per unique combination of VE Program ID AND CIP Code combination.

- If student has multiple Vocational Education records with matching VE Program ID and CIP Code, all applicable statuses report in one row.
- If student has multiple Vocational Education records with non-matching VE Program ID and CIP Code, all unique instances report in a separate row.

Non-Binary Gender Reporting

Schools can assign students a gender of M: Male, F: Female or N: Non-binary. This is done on the [Identities](#) tool and/or the [Demographics](#) tool.

Data Pipeline Extracts and other required extracts use the Legal Gender field included in the Protected Identity Information to report student identity information.

To properly record a gender of N: Non-Binary, on the Identities tool:

1. Assign the **Gender of N: Non-Binary** in the standard identify fields.
2. Assign the **Protected Identity Information Legal Gender** field to M: Male, F: Female or N: Non-Binary.
3. Save the record when finished.

The screenshot shows the 'Identities' tool interface for a student named Luka A. The 'Identity Information' section includes fields for PersonID (120648), Last Name (Student), First Name (Luka), Middle Name (Andrea), and Suffix. The Gender dropdown is set to 'N: Nonbinary'. The 'Protected Identity Information' section includes fields for Legal Last Name (Student), Legal First Name (Luka), Legal Middle Name, and Legal Suffix. The Legal Gender dropdown is set to 'Female'. The interface also shows 'Save' and 'New' buttons, a 'Related Tools' dropdown, and a 'Race/Ethnicity (Edit)' link.

Gender and Legal Gender Assignment

Generate the VE-135 Extract

1. Select the desired **Extract Type** from the dropdown list.
2. Mark the **Report Legal name** to report the student's legal name and gender from the Protected Identity Information section on the student's [Identities](#) record. When this is not marked, the student's name and gender reports from the standard Identity information fields.
3. Select the file **Format**. To review data prior to submission to the state, use the HTML format. For submission to the state, use the State Format (Fixed width).
4. Select which **Calendar(s)** to include in the file. This selection represents the school in which the student receives the vocation education, not necessarily the student's calendar of enrollment.
5. Click the **Generate Extract** button to display the extract immediately. Or, click the **Submit to Batch** button to choose when the extract generates. The extract displays in a separate window in the designated format ordered by the vocational educational record.

Districts can determine which fields are required for entry on the [Vocational Education](#) tab using the [Attribute Dictionary](#) (expand the TEDS attribute). When the fields are marked as Required in the dictionary, an entry must be made in order to save the record. If the Required checkbox is not marked, data does not need to be entered.

If the Required checkbox is not marked and data is not entered for those fields, results on the VE-135 Report are not populated.
