Tool Search: IAR Pre-ID Extract

The IAR Pre-ID Extract produces a file for IAR Pre-ID Label reports. Students in grades 03-12 who have an active enrollment as of the effective date are included and have a Test Accommodations record for one of the IAR Assessments.

IAR PreID Extract

Report Logic

All students who have an active enrollment as of the entered effective date and are enrolled in grades 03-12 report. If the student has multiple enrollments, the most recent primary enrollment reports; if there is no primary enrollment, the most recent active Special Education or Partial enrollment reports.

Students are included multiple times if they are tied to multiple courses and/or have multiple test accommodation records in the selected calendar that meet the following course criteria:

- All of the student's active courses as of the effective date with an assessment tied to the course are found.
- The assessment must have a **Consortium Code** of one of the following:

- ALG01
- ALG02
- GEO01
- MAT1I
- MAT2I
- MAT3I

- MAT03
- MAT04
- MAT05
- MAT06
- MAT07
- MAT08

- ELA03
- ELA04
- ELA05
- ELA06
- ELA07
- ELA08
- ELA09
- ELA10
- ELA11

Assessment Consortium Code

- If the Session Name and Class Name Format is Course Number-Teacher Last Name-Period or Course/Section Number-Teacher Last Name, AND the student is active in multiple sections as of the effective date, both sections report; otherwise, only one record per course reports.

In addition to the **Consortium Code** being populated on the **Test Detail** (see above), the Test also needs to be assigned to a **Course** in which the student is scheduled (Scheduling > Courses > Course > Assessments) and the student must have a score for that **Test** (Student Information > General > Assessment).

Course Assessments

Student Assessments

Students are not reported when:

- Their enrollment record is marked as State Exclude.
- They are enrolled in a Grade Level marked as State Exclude.
- The Calendar of enrollment is marked as State Exclude.

The report sorts data in the following order:

- Test Code
- Assessment Session Name
- Last Name
- First Name
- State ID

Report Editor

Field	Description
Report Type	Indicates which report generates, either the **IAR Pre-ID** or the **Errors and Warnings Report**. There is no logic surrounding the Errors and Warning type.
Session Name and Class Name Format	When populated, the selected value reports the values in the Assessment Session Name and Class Name fields in the IAR Pre-ID Layout. Options are: • Course Number-Teacher Last Name-Period • Course/Section Number-Teacher Last Name • User Populated When the User Populated option is selected, a text box displays (Session Name and Class Name). This is NOT a required selection to generate the report.
File Identifier	A numeric field that notes the number of times the report has been generated. This field is used in the File Naming Convention of the extract to be used when submitting the extract in the State Format (RCDTS or District Name + __ + MMDDYYY_File Identifier).
Strip Apostrophes	When marked, the following marks are removed from student names and other reported data: • Apostrophes ('), Commas (,), Periods (.) • Umlaut (Ö) • Tilde (Ñ) • Grave Accents (Ò), Acute Accents (Ó) • Circumflex (Ô) When not marked, these marks are not removed.
Effective Date	Entered date is used to report students who are actively enrolled. Dates may be entered in *mmddyy* format or by clicking the calendar icon and selecting a date.
First Year in US School Date	Entered date is used to locate students who have been enrolled in school for less than 365 days, based on the date entered on the Date Entered US on the student's Demographics tab.
Report Protected Identities	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.
Format	The report can be generated in either **HTML** or in the **State Format (Comma Delimited)**. The HTML format can be used to review data prior to submission of the extract. The State Format should be used when submitting information to the state.
Choose Grades	Users can select a grade level, multiple grade levels or all grade levels. Use the CTRL and SHIFT keys to select multiple grade levels.
Ad hoc Filter	Selecting an ad hoc filter further narrows the student set to be only those students who are included in the selected filter.

Field	Description
Calendar Selection	A calendar must also be selected when generating the report. This selection only returns students who are enrolled in that calendar and who also meet the reporting criteria.
Report Generation	Use the **Generate Extract** button to immediately display the results of the extract. For a larger data set, use the **Submit to Batch** button. This allows the selection of a specific time in which the extract generates (after school hours). See the Batch Queue article for more information.

Generate the IAR Pre-ID Report

1. Select the **IAR Pre-ID** as the **Report Type**.
2. If desired, select the **Session Name and Class Name Format** option.
3. Enter the correct **File Identifier**.
4. If desired, mark the **Strip Apostrophes** checkbox.
5. Enter the desired **Effective Date** and the **First Year in US School Date**.
6. If desired, mark the **Report Protected Identities** checkbox.
7. Select the desired **Format.**
8. Chose which **Grades** to include in the report.
9. If desired, select an **Ad hoc Filter**.
10. Choose the desired **Calendars**.
11. Click the **Generate Report** to display results of the report immediately; choose the **Submit to Batch** button to determine when the report generates.
