Tool Search: ACCESS Extract

The ACCESS Extract collects demographic and enrollment information about students participating in an EL (English Learners) program.

## Report Logic

A student is included on the report if:

- The student is actively enrolled as of the Effective Date entered on the Report Editor.
- The student has been issued a SID.
- The student is included in SID Management and has an active status.
- The student is EL or Exited EL with an Identified Date that is prior to the Effective Date entered on the report editors, and there is no Exit Date, or the Exit Date is after the entered Effective Date.
- The student is not in Error, Unresolved, Sync, or Conflict.
- The student has been submitted to State and Special Education Submissions without error.

Overlapping enrollments in the same calendar report 1 record per enrollment.

Enrollments that are end dated (consecutive enrollments) are not reported.

## Generate the ACCESS Extract

1. Indicate what **Grades** should appear in the report.
2. Enter an **Effective Date** in *mmdyyyy* format or by clicking the calendar icon and selecting a date. This date will limit the report to enrollments which are active on this date. The field

defaults to the current date.

3. Select the **Use Enrollment Programs** checkbox if you want data to be considered from enrollment programs instead of the student's program participation records.
4. Select the **Format** in which the report should generate. Options are State Format (Fixed Width), CSV and HTML. CSV and HTML formats are used for data review. For submission to the state, use State Format (Fixed Width).
5. Select the **Calendar(s)** which will appear in the report.
6. Click **Generate Extract** to generate the report in the indicated format.
