Tool Search: PERA Extracts

The PERA Demographics and Contribution Reports Extract collects data regarding all staff members within the district who are eligible for Public Employees Retirement Association of Minnesota (PERA) benefits.

PERA Extracts

This tool will extract data to complete the Public Employees Retirement Association of Minnesota reporting extracts. The report will pull all staff members within the district that are eligible for PERA benefits. Staff demographics and payroll information can be generated by selecting the appropriate reporting option. Choose the State Format to get the file in the state defined file format, otherwise choose one of the several testing/debugging formats.

PERA Demographics and Contributions Reports Extract Editor

Electronic Enrollment

The PERA Demographic record must be submitted to enroll members in PERA when any of the following occur:

- An employee newly hired, or a former employee rehired, into a position in which he/she is immediately qualifies for PERA coverage.
- A staff member currently employed who was previously ineligible for PERA coverage but now meets the eligibility requirements.
- An employee who changed positions resulting in the transfer of coverage from one PERA plan to another.
- An employee who changed his/her coverage from another Minnesota retirement system to PERA.

Report Logic

Report Logic is broken down into [Enrollment](#), [Status Changes](#) and [Demographic Changes](#) since a change in each of these categories will cause a record to report. A Retirement Organization of PERA, along with an Eligibility Date before the dates entered on the extract editor are required for staff members to be reported regardless of which criteria they meet.

Enrollment

- Staff members who have a retirement record with PERA selected as their retirement organization, have an account number, and have an Eligibility Date between the Snapshot and Previous Snapshot Dates entered on the extract editor report.

Status Changes

- If a Termination Date, a Leave Date, or a Hire Date (with the exception of a Hire Status of 00 or 20) is found between the Snapshot Date and the Previous Snapshot Date, a record reports.

Demographic Changes

- If the staff member has an identity Effective Date between the date range entered in the extract editor, a record reports if any of the following has changed:
 - First Name
 - Last Name
 - Middle Name
 - Suffix
 - Birth date

Report Editor Options

Field	Description
Extract Type	The type of extract to be generated. PERA Demographics must be selected for this extract.
Snapshot Date	The date on which the date range begins. Dates are entered in mmddyy format or may be entered by clicking the calendar icon and selecting a date.
Previous Snapshot Date	The date on which the date range ends. Dates are entered in mmddyy format or may be entered by clicking the calendar icon and selecting a date.
Enrollment / Status Change	<p>Enrollment: When selected, the Enrollment report logic applies generating records for employees meeting the criteria.</p> <p>Status Change: When selected, the Status Changes and Demographics Changes logic is applied generating records for employees meeting the criteria.</p>
Format	The format in which the report generates. Chose State Format (Fixed width) when submitting to the state, otherwise select either CSV or HTML to review data prior to submission.

Generating the Report

1. Select the **Extract Type**. PERA Demographics should be selected for this report.
2. Enter a **Snapshot Date**.
3. Enter a **Previous Snapshot Date**.
4. Select the appropriate radio button: **Enrollment** or **Status Changes**.
5. Select the desired **Format**.
6. Click **Generate Extract**. The extract will appear in the selected format.
