The Ohio Student Gifted Education (GG) extract is used to report the number of students screened, assessed, identified and served in gifted areas. Districts must report a separate record for each student identified as gifted in grades kindergarten through twelve.

Student Gifted Education Record (GG) editor

See the Gifted article for more information about where this student data is recorded. Gifted records can be added en masse using the Gifted Batch Update tool.

Report Logic

This extract reports a record for each student with an enrollment in the selected calendar(s), sorted by student number.

If a student is enrolled in more than one calendar, reports based on the most recent enrollment with a Service Type of P or N. Students, Calendars, and Grade Levels marked as State Exclude are not included. Students marked as No Show are also excluded.

If a student transfers from one school district to another during the course of the school year, both districts must report a record for the student.

Gifted program records only report if the school year of the record matches that of the student's enrollment.

Generate the Extract

1. Select the Student Gifted Education (GG) **Extract Type.**
2. Select a **Reporting Period.**
3. Select the extract **Format.** For submission to the state, select the State Format (Fixed width) option. To review data before submission to the state, select any of the other available formats.
4. Do no select an **Ad hoc Filter.** Although this field appears available, Ad hoc functionality has not been implemented for the Student Gifted Education extract.
5. Select which **calendar(s)** to include within the extract.
6. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report will generate. If generating multiple extracts at a time (after Campus.1921), requests can only be submitted to the Batch Queue.

Users have the option of submitting a Student Gifted Education report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the Batch Queue article.
