Tool Search: CALPADS Staff Assignment

The Staff Assignment file is used to submit data about staff teaching assignments. This information is reported for all certificated staff (Type 10, 11, 12, 25, 26, 27) who are actively employed on Information Day. Staff members must have a SEID, but staff with a SEID = 999999999 do not report. Multiple records may be submitted when the staff person has multiple assignments in different schools or different Types.

CALPADS Staff Assignment Extract

Report Logic

All staff who have an active District Employment record and an active District Assignment record with Type = 10, 11, 12, 25, 26 or 27 on the reporting date are included.

- Staff must have a Staff State ID (SEID) in Census > Demographics > Person Identifiers that is not blank or 999999999.
- Multiple records should be submitted when a staff member has multiple District Assignments with different Type codes. (One record per Type code per School. A staff person with three District Assignments with Type 12 in the same School reports one record. A staff person with one District Assignment with Type 12 and one with Type 11 reports two records).

- Submit Multiple records when a staff member has multiple District Assignments with the same Type code in different schools.
- In Field 14, the FTE for all active assignments in a school with the same Type are summed for reporting. When the staff person has multiple District Assignments with Types 10,11 or 12, the Non-Classroom Assignment Codes from all appropriate district assignments are reported in Fields 15-21, up to a total of seven unique codes in all district assignments for a given Type.

Staff are not reported when the Exclude checkbox is marked on the staff person's District Assignment record.

Operational Keys

- Academic Year ID
- School of Assignment

This is a FULL REPLACEMENT file. This means that when a file is submitted/posted to CALPADS, and a later file with the same School of Assignment and Academic Year is submitted/posted, the records from the second file *are replaced*, rather than updated or added to, the records from the first file.

Non-Binary Gender Reporting

Schools can assign students a gender of M: Male, F: Female, X: Non-binary. This is done on the [Identities](#) tool and/or the [Demographics](#) tool.

CALPADS Extracts use the Legal Gender field included in the Protected Identity Information to report student and staff identity information.

To record a gender of X: Non-binary, on the Identities tool:

1. Assign the **Gender of X: Non-Binary** in the standard identify fields.
2. Assign the **Protected Identity Information Legal Gender** of M: Male, F: Female, or X: Non-binary.
3. Save the record when finished.

Validate SASS Data

Use the [Data Validation Report](#) to correct any student data prior to the submitting the CALPADS file to the state. Validation Groups and Validation Rules are provided by Infinite Campus for a specific CALPADS extract (listed below). These groups are used to return certain rules assigned to each group.

- [CALPADS SSID Enrollment](#)
- [CALPADS Student Information](#)
- [CALPADS Student Programs](#)
- [CALPADS Student English Language Acquisition](#)
- [CALPADS Student Discipline](#)

- [CALPADS Work-Based Learning](#)
- [CALPADS Postsecondary Status Summary](#)

Modifications to the Validation Rules and Validation Groups can be made if your district has purchased the [Campus Analytics Suite](#); otherwise, they are read-only.

Users can select the **Missing or Incorrect Data** Validation Group, which returns any missing or incorrect data that is reported in the CALPADS Extract, like a missing enrollment exit reason or an incorrect date, for example.

Note that examples refer to CALPADS SENR.

Instructions

The Data Validation Report returns results from the Data Validation Group selected. The Summary section includes the number of occurrences for each Data Validation Rule; if a Baseline Rule is used its Total population will be returned along with the Rate of the primary Rule compared against the Baseline Rule. State Owned Data Validation Groups can be run against the State Dataset via DIS.

Missing or Incorrect Data

The Missing or Incorrect Data Report uses the following rules and logic (open the Click here to Expand section below to see each rule).

This report returns only those staff members whose District Assignment End Date is not populated or whose End Date is before or the same as the calendar end date and after or the same as the calendar start date.

Report Editor

The following fields are available on the Staff Assignment Editor.

Field	Description
Reporting Date	Indicates the date of the report. This field displays the current date and includes active staff as of this date.
Transaction Type	Indicates the type of transaction that occurs - Replace or Delete.
Format	Determines how the report generates. Select State Format (Caret Delimited) when submitting records to the state. Other formats available for testing and review purposes are CSV and HTML.
Ad hoc Filter	Select which staff to include in the extract by choosing a filter that was created in the Filter Designer.
Calendar Selection	Select the calendar of Assignment. Calendars can be chosen by the active year, by the school name or by the year.
Report Generation Options	Choose the Generate Extract to display the results of the chosen items immediately. Choose the Submit to Batch option to generate the report at a specified time. This option is helpful when generating large amounts of data.

Generate the Staff Assignment File

1. Enter the **Reporting Date** in *mmdyy* format, or use the calendar icon to select a date.
2. Select the **Transaction Type** from the dropdown list - Replace or Delete.
3. Select the **Format** of the file. The State Format (Caret Delimited) should be chosen when submitting records to the state. Other formats available for testing and review purposes are CSV and HTML.
4. Use the **Ad hoc Filter** to select staff already included in a filter. This is not required.
5. Select the **Calendars** to include in the file.
6. Click the **Generate Extract** button. Or generate the extract at a specified time using the **Submit to Batch** button. The file appears in a new window in the selected format.
