

Schedule Report Preferences

Last Modified on 02/03/2026 11:01 am CST

Tool Search: Report Setup

A student schedule is a list of courses and course sections for which the student is scheduled (appears on the teacher's roster) during a particular day. This course listing may vary from day to day, or term to term, depending on the school and the student's needs. Campus provides a schedule report for schools to print, or schools can create a schedule report with the options on this page. Saved schedules can be printed from the [Schedule Batch Report](#) and the student's [Schedule](#).

Report Setup - Schedule Preferences

Create a Schedule Report

1. Select the **New** icon. A **Report Detail** and a **Report Options** table appears.
2. Enter a **Name** for this schedule. This name should reflect the type of schedule it is so that users can quickly generate the correct report.
3. Select the **Schedule** option from the **Type** dropdown list.
4. Determine whether or not this report should be available in Campus Parent/Campus Student. If so, mark the **Portal** checkboxes for **Available In**.
5. If desired, enter a **Description** for this schedule.
6. Select the appropriate **Report Options** for the schedule. Refer to the sections below for more information.
7. Click the **Save** icon when finished. The new schedule is listed in the **Reports Editor** and can

also be selected on the [Schedule Batch](#) and on the student's Schedule.

Report Options for Schedules

Option	Description
Report Format	<p>The schedule can be printed in a Table Format or a List Format.</p> <ul style="list-style-type: none"> The Table option prints the schedule in a grid format, listing the periods on the left side and the terms across the top. Courses for each period are in the corresponding term. The List option prints the courses by term and day. When List is selected, Term Options and Period Sequence cannot be selected.
Group By	<p>The Schedule can be grouped by Course or Days. The Days option is useful for schools with rotating schedules (A/B Days, etc.), where all courses for that day's rotation are listed in a separate grid.</p> <ul style="list-style-type: none"> When Group by Course is selected and the Schedule Time Display Option is not selected, period times do not print on the schedule. When Group by Days is selected and the Schedule Time Display Option is selected, period times print on the schedule.
Courses	<p>Only the courses the student is currently scheduled in can be printed by selecting Display Active Courses Only. Or all courses, both actively scheduled ones and those the student has dropped, can be displayed by selecting the Display Active and Dropped Courses.</p> <p>For both options, determine if responsive courses should also be displayed by marking the Include Responsive Courses checkbox. When marked, courses that are considered responsive also print on the report (Responsive Courses do not automatically display).</p> <div style="background-color: #e6f2e6; padding: 10px; margin-top: 10px;"> <p>An Active Course is defined as a course that is not yet dropped, which has one of three impacts, depending on the context of the course:</p> <ul style="list-style-type: none"> If the course met in a previous term, "active" means the roster placement for the student either has a blank (null) end date or the end date is the last date of the term. If the course meets in the current term, "active" means the roster placement for the student either has a blank (null) end date or the end date is greater than or equal to the current date. If the course meets in a future term, "active" has no real meaning, as all future courses are considered active regardless of the start or end date. <p>Responsive courses follow the same logic for Active vs Dropped.</p> </div>

Option	Description
Term Options	Select all terms to print on the report, or some terms. For some schools, printing schedules at the start of each term is easier than printing schedules at the beginning of the year, depending on how often students switch courses, drop courses, etc. Terms cannot be selected when the Report Format is List.
Period	Select which periods to print on the schedule. Often, non-instructional periods (zero period, after school activity periods, etc.) can be left off the schedule. The Period Sequence cannot be selected when the Report Format is set to List. <ul style="list-style-type: none"> • Schedule Time -(when the Report Format is set to List) Prints the period times of the selected periods

Option	Description
Display Options	<p>Choose the following options to print on the schedule:</p> <ul style="list-style-type: none"> • Generated On Date/Time - prints the date and time the schedule report was generated in the report header. • Counselor - prints the student's counselor name below the schedule grid. • Student Username - prints the student's Portal username below the schedule grid. • Team - prints the student's assigned Scheduling Team/Group Name below the schedule grid. • Student Number - prints the student's assigned Student Number in the report header. • Bus Number - prints the number of the bus the student rides below the schedule grid. • Homeroom Teacher - prints the name of the student's Homeroom teacher below the schedule grid. • Lunch PIN - Prints the student's Lunch Account PIN below the schedule grid. This option requires the POS Preference of <i>Allow Student PIN to show on printed Student Schedules</i> to also be selected. • Blended Learning Group - prints the name of the student's Blended Learning Group if the student is assigned to such a group. • Legal Name - prints the student's legal first name, legal middle name, legal last name and legal suffix print if entered in the Protected Identity information and if the user has tool rights to Protected Identity Information (users need at least Read rights to Protected Identity Information). <ul style="list-style-type: none"> ◦ The Effective Date on the Identity Record is not considered when printing the Protected Identity information on a schedule. As long as those protected identity fields are populated on the current Identity record, the legal first/last/middle/suffix values print. ◦ When the legal first name or legal last name is not populated or if the user does not have tool rights to this information, the student's first name and last name reports from the First Name and Last Name fields on the student's current Identity record. ◦ When the Portal - Active checkbox is marked on the Report Detail editor AND the Legal Name option is marked, the Schedule prints the student's Legal Name on the schedule that is generated from Campus Student or Campus Parent. • Locker - prints the student's locker number below the schedule grid. • Locker Type - prints locker information for the selected type of locker below the schedule grid. (locker types display when the Locker option is selected) • Location - prints the locker location below the schedule grid. • Lock Combo - prints the student's locker combination for the assigned locker below the schedule grid.

Option	Description
Mailing Label Options	<p>Determine how the schedule prints for mailing by choosing one of the following:</p> <ul style="list-style-type: none"> • One Copy per Mailing Address - prints one schedule per mailing address (default selection) • Student's Primary Mailing Address Only - prints one schedule per primary mailing address (secondary mailing addresses do not print, primary addresses of secondary households do not print) • Student's Primary Household(s) Only - prints one schedule for the mailing address of the student's primary household • No Mailing Label (prints one copy per student) - prints one schedule for the student without any address information (suitable for handing out directly to students) <p>Selecting a mailing address option does not format the Schedule into an addressed letter format suitable for direct mailing; address information is printed as part of the report header only.</p>
Orientation	The schedule can be printed in either Portrait or Landscape format. Additional space for terms can also be added, if desired. This option is recommended for more than five terms in a year.
School Comment	The School Comment field allows users to include a comment that appears at the top of all printed schedules. School comments can be modified at any time and should be relevant to the individuals receiving the schedule.

Sample Schedule Reports

Example 1: List Format

This example uses the List format type and courses are grouped by Days. Both Active and Dropped courses are displayed, and all Display Options are included. Counselor Name, Username, Lunch PIN, Team Name, Bus Information, Locker Information print AFTER the schedule grid (see Example 4: Display Options).
