Enrollment Overlap Report

See the [Student Information Reports Tool Rights](#) article for the tool rights needed to generate

this report.

Schools available in the Campus toolbar

- **District Edition:** When a year is selected in the School Year dropdown list, the school list is filtered to schools for which the user has rights in the selected year (if the school has at least one calendar).
- **State Edition:** When a year is selected in the School Year dropdown list, the District list is filtered based on districts for which the user has rights in the selected year (when there is at least one calendar in the school for which they have calendar rights).

Report Logic

The Enrollment Overlap Report returns students who are actively enrolled in a school more than one time, enrolled in two or more schools during the same date range, or enrolled in multiple schools in the same date range in the same school year.

Only enrollments for the selected year and school are included. Only enrollments for selected districts (state edition) are included.
