In order to generate this report, users must have Read tool rights for the report type selected as well as rights to any calendar(s) selected. If generating the report for a historical calendar, the user must have modify tool rights for the calendar in order to generate the report for new data. Please refer to the [User Calendar Rights](#) article for more information. For more information about Tool Rights and how they function, see the [Tool Rights](#) article.

Report Logic

Report can be generated at the state and district levels.

Report generates on only one school at a time.

Enrollment records with any of the following indicators are **excluded** from the reports and all calculations:

- BIE Exclude
- No Show
- Not in a BIE Grade Level (01-12) tied to an appropriate BIE Grade Level Code

Report is divided into three sections:

- Eligible
- Non-Eligible
- Exceptions

Within each section the report is grouped with page breaks by Grade. Students within each grade are sorted alphabetically by last name, first name, middle name.

Report Editor

Report Option	Description
Type	<p>Run Verification Report on New Data : Real-time district data is reported in PDF format. Use this option to generate the most recent information.</p> <p>*Reprint Verification Report (PDF) : Data already existing in the ISEP_Ver table reported in PDF format.</p> <p>*Reprint Verification Report (CSV):Data already existing in the ISEP_Ver table reported in CSV format.</p> <p><i>*Reported data is that which was last requested and stored on the table.</i></p>
Select Calendars	The schools available for selection are determined based on the District / School selected in the Campus toolbar. At least one school calendar must be selected in order to generate the report.

Generate Report	To display the results of the report immediately, click the Generate Report button.
Submit to Batch	To display the results of the report at a later time, click the Submit to Batch button. The Batch Queue tool is used by some districts /states to generate large, system-intense reports. It also allows users to view and access historical ISEP Residential Verification reports. See the Batch Queue article for more information.

Report Layout

The following sections describe each section of the ISEP BIE Residential Verification Report.

Header

The header describes the reporting entity, calendar, ISEP reporting date range, and the number of records for the Program Type, Eligibility status, and grade level listed.

Non-ISEP	<p>Indicates if the student's enrollment record Enrollment Type is not ISEP. X = Enrollment Type is 2: Non-ISEP or 3: Public Enrolled</p> <p><i>Alphanumeric, 1 character</i></p>	<p>Student Information > General>Enrollments > Bureau of Indian Education Reporting > Enrollment Type</p> <p>enrollmentBIE.stateAidBIE</p>

Exceptions and Totals

The Exceptions section describes all students for whom the report could not determine eligibility. See the [Eligibility Calculation](#) section for more information.

The Verification Summary for Qualified Students table provides a breakdown of how many students per grade qualified for each category (Residential, ECR, IRG).

► [Click here to expand...](#)

Students with multiple enrollment records in different grade levels are only counted once in all total fields. Students with multiple enrollment records in different grade levels are only counted for the grade level they were most recently enrolled in for the reporting year.

Exceptions and Totals Section of BIE ISEP Residential Verification Report

Column	Description
Total Exceptions	Total number of students who have eligibility exceptions.
Name	The name of each student with an eligibility exception.
Grade	The grade of each student with an eligibility exception.
Exception Type	The type of exception tied to the student.
Verification Summary for Qualified Students	<p>The Verification Summary for Qualified Students section lists totals for each of the following categories:</p> <ul style="list-style-type: none"> • Grade: The grade for each reported value. • Residential: Total number of students eligible per grade. • ECR: Total number of students per grade marked "Y" for ECR. • IRG: Total number of students per grade with an IRG code. • Total: Total number of eligible students per grade.
School Total	<p>The School Totals section lists a school-wide count of the following categories:</p> <ul style="list-style-type: none"> • Residential: Total number of eligible students within the school. • ECR: Total number of students within the school marked "Y" for ECR. • IRG: Total number of students within the school with an IRG code. • Total Students: Total number of eligible students within the school.

Eligibility Calculation

ISEP funding is distributed to schools and dormitories based on membership eligibility. If a student's membership / enrollment meets **all** of the required eligibility criteria, that student's record receives a status of Eligible. In cases where a record fails to meet one or more of the eligibility criteria, that record is listed as Non-Eligible. Each enrollment is analyzed individually to determine eligibility status; therefore, the same student may have enrollment records that appear under both sections.

► [Click here to expand...](#)

Student enrollment records are considered eligible if they meet all of the following criteria:

- Enrolled in an Residential program for the selected calendar (Calendar.calendarID matches enrollment.calendarID and calendar.type = R)
- Enrollment record has an Enrollment Type = 1: ISEP.
- Student has a valid birth date.
- Student has a Tribal Code not null or 999: Non-Tribal Member.
- Student is enrolled in a recognized BIE grade level of 01-12. The grade level should be mapped

to a BIE Grade Mapping. If not, logic looks at the State and Local Grade level to determine if it matches a BIE Grade Mapping value.

- Student has a gender of Male or Female.
- Attendance marked present at afterschool and midnight bed checks at least one day for each of the dorm's three count weeks (see the Attendance Calculation section for more information).

Student enrollment records are considered Non-eligible if they meet any of the following criteria:

- Enrollment record has an Enrollment Type = null or any value other than 1: ISEP (System Administration > General > Enrollment > BIE Reporting > Enrollment Type).
- Student has a Tribal Code = null or 999: Non-Tribal Member.
- Student is in Kindergarten.
- Student's enrollment record start date is after the end of the first count week.
- Student's enrollment record end date is prior to the start of the third week count week.
- Students who were not present for both checks on at least one day of each of the three count weeks, with the exception of students with an attendance status of absent: exempt.

Student enrollment records are considered Exceptions when any of the following data inconsistencies are identified:

Students are listed in the Exceptions section of the report when their eligibility or non-eligibility requires further investigation. Students who are listed with Exceptions will also be listed in the Eligible or Non-Eligible section of the report.

- Student is enrolled in more than one Residential program. This can occur if a student terminates enrollment and then re-enrolls. (Exception Code: MultCal)
- Student has enrollment records in different grade levels within the same calendar. In most cases, a student should not be enrolled in two different grade levels at the same time. If this exception is identified the enrollment records are flagged for further investigation by the school and ERC. (Exception Code: MultGrade)
- Student has multiple enrollment records during the count weeks (i.e., the student left and came back during count weeks). It is possible that neither enrollment record would be eligible but combined enrollments would make the student eligible. (Exception Code: MultEnroll)

Attendance Calculations

Only calendars meeting the following criteria report data:

- Flagged as Residential.
- Does NOT have the Exclude checkbox marked.
- Does NOT have the Non-Instructional checkbox marked.

► [Click here to expand...](#)

Students must be present for both instructional periods for 1 or more days each count week to be considered eligible. This is calculated using the following logic:

- Count week start and end dates are determined for the calendar (System Administration > Calendar > Calendar > ISEP Dates).
- Logic determines the number of instructional days a student was enrolled for the count week. Logic looks at the student's enrollment record start and end dates to determine if they were enrolled for all or a portion of count week. Instructional days are marked on the Days tab as School Day, Instructional and Attendance (System Administration > Calendar > Calendar > Days > School Day, Instructional, Attendance).
- Logic determines the number of distinct days the student is marked as Absent for one or both instructional periods for an instructional day within the date range. Absences marked as AEX: Absent Exempt or EREX: Early Release Exempt do not count as an absence.
- If the number of days the student was absent is greater than or equal to the number of instructional days enrolled, the student is considered ineligible for attendance.

If a student has multiple enrollment records included in the report, the calculation is made one time, using attendance from all enrollments:

- The count weeks are determined for each calendar; if the student is enrolled in more than one calendar (System Administration > Calendar > Calendar > ISEP Dates), unique count weeks are determined. A unique week is any week with a unique start date/end date combination. If all calendars have the same count weeks, only 3 weeks are possible, but more weeks are possible if calendars do not all have the same count weeks.
- If a student is in attendance or has an absence with an Excuse code of Exempt for instructional periods in at least one day in at least 3 unique count weeks, the student will be counted as eligible for all enrollments used in the calculation. If the student is not present and does not have an absence with an Excuse code of Exempt for at least one day in at least 3 unique count weeks, the student will be counted as ineligible for all enrollments used in the calculation.
- When attendance for a student is calculated from multiple enrollments, each record for that student will report an asterisk next to the student's name. At the bottom of the exceptions page at the end of the report, a note will read "Records marked with * next to a student's name have had residential attendance eligibility calculated from multiple enrollments."
