Location: System Settings > Portal Preferences

The Campus Portal provides parents/guardians and students access to student information and school communications. This is an optional feature free-of-charge to the school district. Students and parents/guardians must have received a Portal URL to access the Campus Portal and the School District should establish Terms of Use and review the [Portal Setup](#) information prior to allowing access.

The Portal folder in System Administration provides schools with configuring features available to parents and students on the Portal. In addition, Self Service preferences, the Portal Usage Report and the Portal Request Summary Report are located in this folder.

Display Options determine what tools and data appear in the Campus Student and Campus Parent Portals. Display Options are set by Calendar/Structure using a Display Options Template created by the school. Each Calendar/Structure can be assigned to only one template. Select a Template to modify it or click New Template to create a new one. Select a Calendar/Structure to assign to a template and enable the calendar and terms. [Read More](#)
