

Dual Enrollment (Rhode Island)

Last Modified on 07/18/2024 2:54 pm CDT

[Extract Logic](#) | [SQL Query](#) | [Extract Editor](#) | [Generate the Dual Enrollment Extract](#) | [Extract Layout](#)

Tool Search: Dual Enrollment

The Dual Enrollment Extract provides a list of students who are in dual and concurrent enrollment or other advanced network coursework in post-secondary institutions. Data can be submitted throughout the year, as information becomes available (at the end of grading terms, etc.). All students are included in the report, regardless of them earning credit or not.

The screenshot shows the 'Dual Enrollment' tool interface. At the top, there is a breadcrumb trail: 'Reporting > RI State Reporting > Dual Enrollment'. Below this is a blue header bar with 'RI Dual Enrollment'. A descriptive text box states: 'This tool will extract data to complete several formats of the RI state-defined reporting formats. The report will generate students who are enrolled and have been rostered in a DUAL or CONCURRENT Post Secondary Course.' The main area is divided into two sections: 'Extract Options' and 'Select Calendars'. Under 'Extract Options', there is a 'Format' dropdown menu set to 'Comma Separated (CSV)', a 'Report Legal Identities' checkbox which is unchecked, and a 'Generate Extract' button. Under 'Select Calendars', there is a question 'Which calendar(s) would you like to include in the report?' followed by three radio button options: 'active year' (which is selected), 'list by school', and 'list by year'. Below these options is a scrollable list box containing the following items: '24-25', '24-25 [object Object]', and '24-25 North Smithfield High Sc'. At the bottom of the list box, there is a small instruction: 'CTRL-click or SHIFT-click to select multiple'.

Extract Logic

Students are included in the report when they are scheduled into DUAL or CONCURRENT or OTHER post secondary courses. This is determined by the Enrollment Type field on the Course editor. If the Decline Dual Credit checkbox is marked on the [Roster Batch Edit](#) tab for any student, that student is not included.

- Only active students report.
- Only active courses report.

Students are not reported when:

- Their enrollment records are marked as State Exclude or No Show.
- They are enrolled in a grade level marked as State Exclude.
- They are enrolled in a calendar marked as State Exclude.

SQL Query

```
EXEC [get_RI_DualEnrollment] @calendarList ='57'
```

Modify the calendar number (in the example above, this is 57) to match the number for your district.

Extract Editor

Field	Description
Format	Indicates how the extract generates - CSV or HTML.
Calendar Selection	Indicates from which calendar student and course information reports. At least one calendar needs to be selected in order to generate the extract. Calendars can be chosen by the active year, by school name or by year.

Generate the Dual Enrollment Extract

1. Select the desired **Format**.
2. Select the desired **Calendar(s)**.
3. Click the **Generate Extract** button.
