Tool Search: ISEE Extracts

The Student Demographics Extract reports demographic data on a student level for students enrolled in the district during the selected date range. If a student has multiple primary enrollments on a given date during the date range, a record is reported for each enrollment. This extract reports all calendars chosen in the extract editor unless marked as State Exclude.

ISEE Extracts

To report state preferred cumulative submissions; select a Start Date of your district's earliest calendar start date and an End Date of the appropriate Collection Period end date.

Staff Assignment: Enter assignment codes separated by a comma (no space) in the 'Report as 0 Assignment Override' field as needed. For additional information [click here](#).

To generate Staff Demographics, Staff Assignment, Student Demographics, Student Attendance, and District Calendar extracts at the district level for state submission, select All Calendars.

Student Demographics, Student Attendance, and District Calendar files generated for a single calendar report records for those students whose School of Primary Responsibility is the selected calendar. Students in calendars flagged as JDC Attendance also report.

District Calendar: For Kindergarten Calendars or calendars that contain grade levels with a Kindergarten Session Type of 3, 4, or 5, the Start Date must be designated as being in Week 1 or Week 2 for correct reporting. Other Kindergarten Session Types do not have varying weeks and thus do not need to have the Week designated.

ISEE Extracts - Student Demographics

## Student Demographics Extract Logic

- Only students in a State Grade Level of NG, EC, PK, KG, or 01-12 report.
- Enrollments with Service Type: N do not report.
- Students marked as State Exclude, in a grade level marked as State Exclude, or in a Calendar marked as State Exclude do not report. No Show enrollments are also not reported.
- A record is reported for each student actively enrolled at least one day during the extract Date Range. Each student reports one record per [School of Primary Responsibility](#) even if the School of Primary Responsibility's calendar is not selected in the extract editor, as long as the student has active enrollment in at least one selected calendar.
- If "Exclude PK" is marked on the extract editor, students enrolled in grade PK will not report.
- Demographic data reports based on the student's Identity record that is active on the extract End Date.

- Records are reported for each entry/exit into a calendar flagged as JDC Attendance when selected in the extract editor.

## School of Primary Responsibility

The School of Primary Responsibility is the school that receives funding for a student, compared to other schools where the student may have partial enrollments. To determine the student's School of Primary Responsibility, all primary enrollments active at the same time are considered.

- If only one enrollment is flagged as Primary on a given date, that enrollment identifies the School of Primary Responsibility.
- If more than one enrollment is flagged as Primary on a given date, the School of Primary Responsibility whose calendar has the highest calendarID.
- If the student has no primary enrollments on a given date, the School of Primary Responsibility is the one of the secondary enrollment whose calendar has the highest calendarID.
- Enrollments in a calendar marked as JDC Attendance are not considered when determining a student's School of Primary Responsibility.

Day records report the same derived calendarID value as long as their School of Primary Responsibility enrollment remains active. A new value reports if the student's enrollment transitions. If a dual-enrolled student has an attendance record on a day when their School of Primary Responsibility is closed (reporting isInstructionTime as 0.0 in the District Calendar extract), a record does not report for that day in this extract.

Field	Description
<b>Start Date</b>	The earliest date from which data is pulled for the report. <i>(Required)</i>
<b>End Date</b>	The latest date from which data is pulled for the report. <i>(Required)</i>
<b>Exclude Cross-Site Data</b>	Cross-site section enrollment data is <b>not</b> included in the report when checked. <ul style="list-style-type: none"> <li>Cross-site enrollment functionality must be enabled at the district level for the checkbox to display.</li> <li>Defaults to checked.</li> </ul>
<b>Exclude PK</b>	This checkbox indicates that students with a State Grade Level of PK should not be included in the report.
<b>Ad Hoc Filter</b>	This field allows users to use an Ad hoc filter that was created in the <a href="#">Ad hoc Filter Designer</a> . Only one Ad hoc filter may be selected.
<b>Format</b>	The format in which the report will generate. Options include CSV and HTML.
<b>Select Calendars</b>	The calendar(s) from which data is pulled for the report. Can be set to display only the active year's calendars, or be sorted by school or by year.
<b>Batch Queue</b>	Users have the option of submitting a District Calendar report request to the batch queue by clicking <b>Submit to Batch</b> instead of Generate Extract. This process will allow larger reports to generate in the background, without disrupting the use of Campus. For more information about submitting a report to the batch queue, see the <a href="#">Batch Queue</a> article.

## Chronically Absent Logic

Chronic Absenteeism is calculated at the school level as follows. The chronicallyAbsent field reports as Y/N based on the running total of eligible absent days divided by the maximum possible instructional/scheduled days for each School of Primary Responsibility record reported.

The maximum possible instructional/scheduled days value is calculated as the total number of unique instructional days from the student's earliest enrollment date to either the end date of the School of Primary Responsibility or the extract end date, whichever is earliest. For an instructional day to count towards the total, the student must be scheduled into at least one class that takes attendance on that day.

The eligible absent days value is calculated as days in which the student was marked as absent (excused, unexcused, or unknown) for at least 50% of their scheduled attendance time. Students with multiple enrollments must be absent for at least 50% of all possible attendance minutes across all enrollments. If a student is enrolled in a calendar flagged as JDC, the calculation only considers instructional days in this calendar only to determine absence thresholds.
