

Ed-Fi v3.X - Student School Attendance Event Resource Preferences

Last Modified on 05/19/2026 1:00 pm CDT

Tool Search: Ed-Fi Configuration

The Ed-Fi Configuration tool is used to establish Ed-Fi data resources.

The following describes how to set the resource preferences for the Student School Attendance Event resource. If the Configure or Edit buttons do not display, then the resource does not need to be mapped and the toggle button can be used to turn the resource on or off.

If a mapping is changed, a resync must be performed on the resource in order for the new mappings to send correctly.

1. Select the appropriate **Ed-Fi Code** for the Attendance Event Category Descriptors

Any item not mapped will not report to Ed-Fi.

Attendance Status and Excuse Descriptors

UI Location Student Information > General > Attendance

Attendance Event Category Descriptors	
AttendanceExcuse State Code	Ed-Fi Code
