Import a File | Import Layout

The Unique ID Import uploads student and staff files that include Unique IDs for users that don't yet have them assigned.

When importing a record, the header record is validated before data can be imported. For student records, files are matched using the State ID, Local Student Number, Last Name, First Name, Middle Name and Birth Date. Staff records are matched using the Social Security Number, Last Name, First Name and Birth Date. For either type of record, if a Unique State ID already exists for the individual, an error will report for that record.
