Tool Search: Unique ID Export

The state EUID system in Idaho is designed for the request and import of both student and staff identification numbers. The Unique ID Export is used to request unique IDs for individuals who do not have them.

Unique ID Export ☆ Reporting > ID State Reporting > Unique ID Export

ID State Extracts

This tool will extract a record for each student that does not have a State ID from the calendar selected. Choose the State Format to get the file in the state defined comma separated file format, otherwise choose one of the testing/ debugging formats.

Extract Options

Protected Identity Information

(Mark to report student data from active Protected Identity Information (Legal Name and Gender fields) or leave unmarked to report student data from active identity information displayed on the Demographics tab.)

Format:

Select Calendars

Which calendar(s) would you like to include in the report?

active year
 list by school
 list by year

23-24
 23-24 Ada County Detention Cen
 23-24 Adams Elementary School
 23-24 Amity Elementary School
 23-24 Boise Online Elementary
 23-24 Boise Online Secondary

Unique ID Export Extract Editor

Report Logic

This extract returns one record for each student in the selected calendar who does not have a Student State ID. Students marked No Show or State Exclude and Calendar or Grade Levels marked as State Exclude will not be included. Records are sorted by Calendar, then by student last name.

Generating the Extract

1. Indicate if the export should include **Protected Identity Information**, which reports Legal name and gender fields, or unmark to report general identity information.
 - If Protected Identity Information is marked but the student's legal name and gender fields are blank in Campus, a record reports with their name and gender fields left blank. Campus recommends adding protected identity information for that student and generating the file again prior to uploading to the state.
2. Select the **Format** in which the report should be generated. Use *State Format (CSV)* for submission to the state or *HTML, TSV, or XML* for data review and verification.
3. Select which **Calendar(s)** should be included in the report.
4. Click **Generate Extract** to view the report in the designated format.

	A	B	C	D	E	F	G	H
