## Report Logic

- Enrollments, Calendars and Grade Levels marked State Exclude do not report.
- The default logic for the report will be to report 1 record for each student in a school that meets the criteria.

### Register Report Logic

- Students whose enrollment start date is within the date range of the report extract and whose Enrollment start status is not 02, 10 or 11 report.
- The Enrollment start date must be on or after the report start date AND on or before the report end date.
- If more than one enrollment meets the date range, the following logic applies:

If the <b>Report All Records</b> checkbox is...	Then...
Selected	a record reports for each enrollment.

If the <i>Report All Records</i> checkbox is...	Then...
NOT Selected	the enrollment with the most recent start date reports. If the start date is the same, the highest enrollment ID reports.

### Unregister Report logic

- Students whose enrollment end date is within the date range of the report extract and whose exit type is not 01 report.
- The student's Enrollment end date must be on or after the report start date AND on or before the report end date.
- If the Exclude Cross-Site Data checkbox is marked, [Cross-Site](#) data is not included in the report.
- If more than one enrollment meets the date range, the following logic applies:

If the <i>Report All Records</i> checkbox is...	Then...
Selected	a record reports for each enrollment.
NOT Selected	the enrollment with the most recent end date reports. If the end date is the same, the enrollment with the highest enrollment ID reports.

### Change Report logic

- Students who have a mid-year grade level change report.
  - The student's Enrollment start date must be on or after the report start date AND on or before the report end date AND the state grade level from the enrollment being reported can not be equal to the state grade level from the previous enrollment in the same school year.
- Students who have a mid-year building change report.
- Students that enter Special Education and the Nexus District Entry Date is within the date range of the report extract report.
- Students who exit Special Education and their Special Ed Exit Date is within the date range of the report extract report.
- Students who change their Nexus District report.
- Students who have an identity change in the date range selected on the extract editor report.
- If the Exclude Cross-Site Data checkbox is marked, [Cross-Site](#) data is not included in the report.
- If more than one enrollment meets the date range, the following logic applies:

If the <i>Report All Records</i> checkbox is...	Then...
Selected	a record reports for each enrollment.
NOT Selected	the enrollment with the most recent end date reports. If the end date is the same, the enrollment with the highest enrollment ID reports. Students with an identity change only report one record from their current identity.

### Summer Roll-Up Logic

When you generate this report type, records report when students are advancing to the next grade level from the previous school year to the next.

- The student's enrollment start date must be on or after report start date AND on or before report end date AND have an enrollment start status in 02,10,11.

- Records do not report if the Withdrawal Date is populated AND the date is ON or Before the Enrollment Start Date.
- If more than one enrollment meets the date range, the enrollment with the most recent start date reports. If the start date is the same, the enrollment with the highest enrollment ID reports.
- A record does NOT report if the student's Grade Level AND Facility Code Override and/or Facility Code 2 are the same as their previous enrollment.
- Date override fields are available on the extract editor for this report type.
  - Facility/Grade Exit Date Override** - The "Facility/Grade Exit Date" element reports the date entered in this field. If there is no date in this field, the end date from the previous year's enrollment reports. If there is no end date, the last instructional day from the calendar associated with the previous year's enrollment reports.
  - Facility/Grade Entry Date Override** - The "Facility/Grade Entry Date" element reports the date entered in this field. If there is no date in this field, the start date from the enrollment reports. Otherwise, the field reports blank.
