The SAE Calculation Tool determines State Aid Eligibility (SAE) and populates the State Aid Eligibility field on the [Enrollment](#) tab. SAE is reported in the [September 30th Attendance](#) report.

The [September 30th Attendance and Enrollment](#) report requires districts to report a State Aid Eligibility type. The calculation used to determine the eligibility is very complex. To ensure the extract generates in a reasonable amount of time, the SAE calculation is completed using this tool.

MD SAE Calculation Tool

This tool auto calculate the State Aid Eligibility and populate a value in the enrollment field. The calculation will be based on the calendar(s) selected in the editor. If more than one calendar is selected the results file will only be available in CSV.

Users must select an operation of either Overwrite or Fill Null Values Only

Overwrite: Will overwrite only existing values in the database

Fill Null Values Only: Will only populate a value if current value is null

It is recommended that a test be run prior to the running the calculation. The "test" option will provide a results report that includes number of enrollments updated. The generate option will also provide these results.

If batch is selected, user must navigate to the batch que or process inbox to receive the results reports.

This tool can be run for previous or current calendars

State Aid Eligibility Results Report

- Click the **Generate** button or **Submit to Batch**.

Result

The tool updates student's State Aid Eligibility values based on the options you selected on the editor. If a student is not able to meet any of the state aid eligibility values, a record does not report and the student appears on the errors extract. If the student does not have an active household address as of the September 30th date, the student reports with all address fields null. If the student is tied to more than one household, a record for each household reports.

Attendance Calculation Logic

- The attendance calculation is used to determine the following specific eligibilities: 00, 01, 04, and 06.
- The student must have an enrollment in the selected calendar(s). If the student has multiple enrollments in the selected calendar, multiple enrollments may be updated and appear on the Results Report unless the enrollment is marked as state excluded.
- The calculation is based on information from the September 30th date through the system date. No future data is considered.
- If the student has a value in the FTE field on their enrollment, then the tool completes the following steps.
 1. Finds the number of student day minutes from the calendar.
 2. Multiplies the number of student day minutes by the FTE (move decimal of FTE to the left two places).
 3. Divides the number of minutes the student was absent by the product.
 - Absences are defined by any Attendance Code tied to a state code of 1-21
 4. Converts the percent absent to the following values.

Percent Absent	Absent Value	Attendance Value
0-33	0	1
34-66	.5	.5
67-100	1	0

- If the student does NOT have a value in the FTE field on their enrollment, then the tool calculates the total number of absences for the reporting period based on the values found in System Administration > Calendar > Whole Day (absence) and Half Day (absence). Absences are defined by any Attendance Code tied to a state code of 1-21.
 - If the student does NOT have an FTE filled out on their enrollment AND is not scheduled into any instructional periods, they are considered absent for the day.
-
