The Student Discipline and Health Related Exclusion extract reports discipline incidents associated with a state-coded disposition.

Student Discipline and Health Related Exclusion Editor

Report Logic

- This extract reports Behavior Incidents with a state-coded resolution and incident dates between July 1st and June 30th of the reporting year.
- All incidents with a state-coded resolution report, regardless of whether or not they occur on the same date.
- If an incident contains multiple events, only the most serious event in which the student participated is reported. This is based on the event being marked as Most Severe. If multiple events have Most Severe marked or no events have it marked, the lowest event ID event reports.
- Offense Codes 001 (Immunization) and 002 (Personal health), report from the student's attendance. The student must be absent for the entire day and have the Role "Offender" to report.

Title I Determination Logic

- If the student has an active Title1 Flag with a state code of T1 and is marked as state reported as of the incident date Y reports, proceed to the following logic.

- If the student has a value in the home school field on their enrollment AND there is a school in the district with that state school code, then Campus finds the school record that falls as of the end date in the extract editor and reports the value from the Title 1 field on that school.

Code in School	Description	Reports
TGELGBNOPROG	Targeted Assistance Eligible - No Program	N
TGELGBTGPROG	Targeted Assistance Program	N
SWELIGTGPROG	School-wide Eligible - Targeted Assistance	N
SWELIGNOPROG	School-wide Eligible- No Program	N
SWELIGSWPROG	School-wide Program	Y
NOTTITLE1ELIG	Not a Title I School	N

- If all values are null, **N** reports.

Absent Calculation for 001 and 002 Offense Codes

The following logic applies if the student does NOT have an FTE override filled out on their enrollment.

- Campus calculates the total number of absences for the reporting period based on the values found in the Whole Day and Half Day fields (see Calendar Information). Absences are defined by any attendance code tied to a state code of **17** or **99**.

The following logic applies if the student HAS a value in the FTE override field on their enrollment.

Step	Action
1	Campus finds the student's FTE on their enrollment.
2	Campus finds the number of student day minutes from the calendar.
3	Campus multiples the number of student day minutes by the FTE.

Step	Action
4	Campus divides the number of minutes the student was absent by the product from number 3. Absences are defined by any attendance code tied to a state code of **17** or **99**. | Percent Absent	Absent Value	Attendance Value
---	---	---
0-33	0	1
34-66	.5	.5
67-100	1	0	

Report Editor Fields

Field	Description
Run Date	This date populates the Submission Date field on the extract.
Date Range	The report can be run to only include data with a date range. • By default, the date range start date is July 1 of the reporting year. • By default, the date range end date is June 30th of the reporting year. The End Date cannot exceed June 30th of the reporting year.
Choose Grades	Only active grade levels from schools during the report date range display.
Ad Hoc Filter	Ad Hoc Filters are available for you to narrow the report results.
Format	Determines how the report will be generated. • State Format (Fixed Width) • CSV • HTML
Exclude Cross-Site Data	Cross-site section enrollment data is **not** included in the report when checked. • Cross-site enrollment functionality must be enabled at the district level for the checkbox to display. • Defaults to checked.

Field	Description
Select Schools	The School(s) from which data is pulled for the report. The extract editor excludes schools that were not active during the report date range. Schools must have at least one instructional day on/after the start date OR on/before the end date of the report **Date Range** to appear in the **Select Schools** list.
Generate Report Submit to Batch	Users can submit the report request to the batch queue by clicking **Submit to Batch** instead of **Generate Extract**. This process allows larger reports to be generated in the background without disrupting Campus. See the Batch Queue article for more information about submitting a report to the batch queue.
