Set the Days to Flag Roster Additions | Start Date Logic

Tool Search: System Preferences

The **Days to Flag Roster Additions** system preference determines the length of time a student's name will appear in green color within a section roster in both the Instruction module and on Course Section rosters. This gives the teacher and any office staff an indication that the student is new to the section.

The default value for this preference is 10 days. A value must be entered for this preference

Set the Days to Flag Roster Additions

- 1. Enter a numeric value in whole numbers only up to two digits (1 to 99).
- 2. Click the **Save** icon when finished.

Any students with a start date entered on a section roster will display in green font in the following areas for the specified number of days:

Module	Tool
Campus	<u>Attendance</u>
Instruction	Seating Chart and Lab Seating Chart
	Positive Attendance
	<u>Grade Book</u>
	Posting by Task
	Posting by Student
	Roster
	Student Groups
	Seating Charts
	<u>Lockers</u>

Module	Tool
Scheduling & Courses	Student name color is based on the entered effective date, not on the current date.
	Section Attendance Section Roster Section Grading by Task Section Grading by Student
Attendance	Student name color is based on the entered effective date, not on the current date.
	Classroom Monitor Mobile Attendance

Start Date Logic

Note the following:

- This preference will determine the number of days the start date is green in roster views.
- The roster start date is considered Day 0 of the roster flag time period. If the roster start date is in the past, a student may never display in green text.
- If no roster start date has been entered for a section, the student name will not display in green.
