

# Create Course Plan Templates for Academic Programs

Last Modified on 03/21/2024 9:18 am CDT

[Best Practices](#) | [Things to Know](#) | [Course Plan Template Warnings, Alerts and Errors](#) | [Add Courses to a Plan Template](#)

Tool Search: Academic Programs

The Course Plan Template allows counselors/administrators to mass add courses to a student's [Course Plan](#). For example, a graduation program for incoming eighth graders contains all of the core courses high school students must take and pass for the next four years. Instead of adding those courses individually for each student, administrators can create course plans for that graduation program. When students are assigned to that program, the Academic Planner automatically adds the courses from the Course Plan Template into the students Course Plan.

  - GPA Requirements
  - Course Plan Template
- Culinary Arts
- Life Skills

**Course Plan Template**

This tool associates a program with a Course Plan Template. For detailed information on entering data in these fields, refer to the [Knowledge Base](#).

When students are assigned to this Program, the courses selected in this Course Plan Template are applied to their plan.

Calendar to select courses from: 20-21 Harrison High Clear Template

*Course Plan Template for Academic Programs*

Additional courses the student wants to plan outside of this template can be added by the student on the Portal using the [Academic Planner](#) tool. Additional single courses the counselor wants a particular student to plan can be added using the [Course Plan](#) tool in Academic Planning.

Individual changes can still be made for students who need to alter the plan.

Students can take the courses in different grade levels than what the plan suggests. If the template indicates that Algebra I be taken in 9th grade, but the student successfully completed that course in 8th grade, the 9th grade math course might instead be Geometry, which is planned for 10th grade.

When planning for current year, course plan templates apply any course that is on the template for a student who meets the current year planning requirements (no scheduled courses for the current year, no transcript courses for the current year). If planned courses already exist for students in the current year grade level, the Course Plan Template does not apply course plans to the current year grade level. See the [Course Plan](#) article for more information on planning for the current year.

## Best Practices

This tool is best used for incoming 9th grade students who do not have any existing scores posted to a transcript from a previous high school enrollment. When a program is assigned to a student, students are assigned this template, along with the other program requirements (course requirements, test requirements, etc.). The Course Plan Template courses are automatically added to the student's Course Plan tab. If the student is assigned both a graduation program and an academic program, the academic program courses also display on the Course Plan tab.

Course Plan Templates only add a planned course into a cell if nothing has previously been planned or added to the student's transcript. The Course Plan Template only adds courses to the Course Plan if the box in the Credit Type and Year is blank. **It does not append/overwrite if there is a planned course or a course on the transcript in that credit type/year.**

In the example below, the student is assigned both a graduation program and an academic program.

The screenshot displays two overlapping windows from the Infinite Campus system. The background window is titled 'Graduation Programs' and shows a tree view of program categories like 'Course Requirements', 'Test Requirements', and 'HS Graduation'. The foreground window is titled 'Academic Planning Course Plan' for student Justin Abegg (Grade 09 #123456). It shows a grid of course requirements for Grades 09 through 12 across various subjects: English/Language Arts, Mathematics, and Science. Each cell in the grid contains a course code and credit information. For example, in Grade 11, English 11-1.0 and Math III-1.0 are listed. Alerts are present for 'Computer Science Compound Requirement not met' and 'Course Requirement not met' for English and Science courses. The student's profile information, including name, grade, and DOB, is visible in the top right corner of the foreground window.

*Student Course Plan - Assigned to Academic and Graduation Program*

This tool can also be used for students who already have scores posted to their transcript. The course plan template does not add courses from a grade level the student has completed (ended enrollment). If a student transfers from another high school in the junior year, and has transcript records for the freshman and sophomore year, courses that are on the template for the junior and senior year are added to the transfer student's course plan for Grade 11 and Grade 12. The columns for Grade 09 and 10 contain the transcript information (from the transfer courses).

## Things to Know

For courses like Band or Choir, or other courses that can be taken multiple times throughout a student's high school career, make sure these sorts of courses are marked as Repeatable. Another option is to set these courses up as individual courses for each grade level. 9th graders would have a Band - Grade 09 course, 10th graders would have a Band - Grade 10 course, etc. The Course Plan Template will not add a course to a student's plan that has already been planned, which means a course that could be repeated would not be added.

If the student has already planned courses for future grade levels in a certain credit area, courses from the plan template are not added for that area. If a student already has transcript scores for a course in the plan, it is not added again.

Courses in which the student is already scheduled are not added to the course plan.

Courses cannot be locked on the plan template. This action is only available to a counselor on the student's Course Plan tab.

Using Course Plan Templates is a plan for students' graduation or career tech program. This is not a tool to mass assign actual courses to student schedules. That process is performed using the [Scheduling Board](#) and other Scheduling tools.

## Course Plan Template Warnings, Alerts and Errors

Just like the display on a student's Course Plan, alerts display on the Course Plan Template when a [Planning Rule](#) is violated during the creation of the template. Each time a change is made on the Course Plan, all rules and requirements are reevaluated and updated alerts and messages display. The Course plan does not need to be saved to show these alerts. When the alerts have been satisfied, they will be removed automatically.

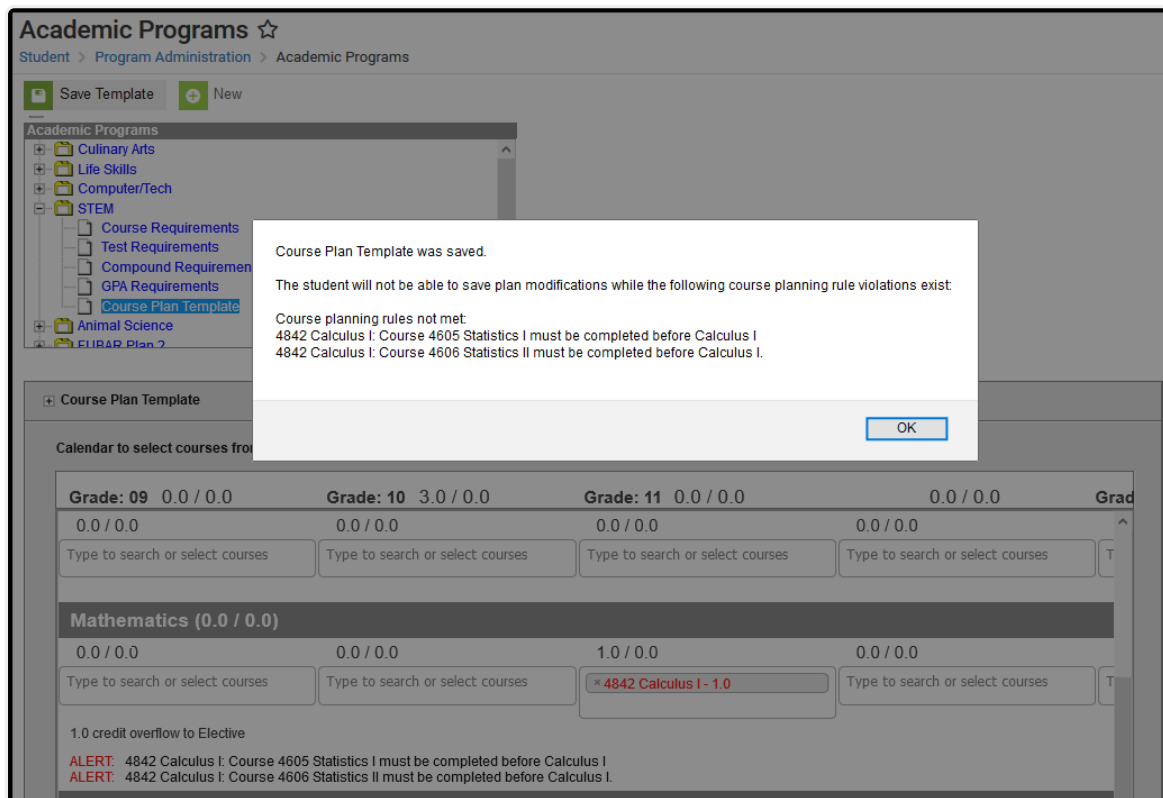

Counselors can still save course plans when alerts and warnings exists.

The screenshot shows the 'Academic Programs' interface. On the left is a tree view of 'Academic Programs' including Culinary Arts, Life Skills, Computer/Tech, STEM, and Animal Science. The 'Course Plan Template' section is active, showing a calendar for '2019-20 Armstrong'. Below the calendar is a table of course requirements for Grades 09 through 12. Under the 'Mathematics (0.0 / 0.0)' section, the course '4842 Calculus I - 1.0' is listed under Grade 11 with a credit of 1.0. This course is highlighted in red. Below the course list, a red alert box contains the following text:

1.0 credit overflow to Elective  
**ALERT:** 4842 Calculus I: Course 4605 Statistics I must be completed before Calculus I  
**ALERT:** 4842 Calculus I: Course 4606 Statistics II must be completed before Calculus I

*Alerts and Warnings in Course Plan Templates*

In the image above, the template has placed course (4842) in Grade 11 without its prerequisite courses (4605 & 4606) planned. The course shows in red and an alert is displayed below the credit type indicating an issue exists. The template can be saved with this alert, but the student will not be able to modify their plan. Below, a warning message displays, indicating such.

*Course Plan Template Saved with Active Alert*

Warnings display when:

- There is a failure in the template that prohibits the student from modifying and saving their course plan.

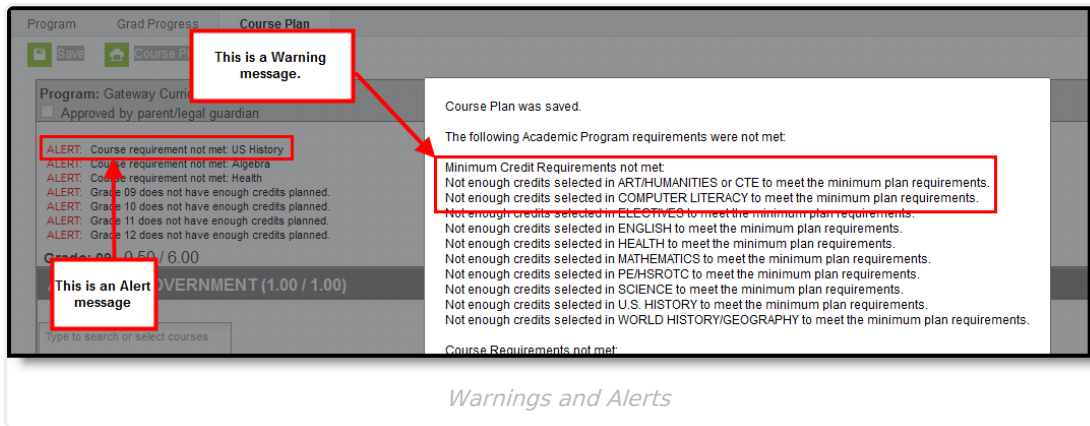

Alerts display when:

- A grade does not have enough credits planned.
- A credit type does not have enough credits planned.

Students who have an Academic Plan that contains an error will not be able to save changes made to their course plan from the Portal.

Certain [Portal Display Options](#) apply here that can be turned on or off to show these rules.

- When the **Enforce All Rules** option is marked as part of the Academic Planner option, students can only save their academic plan if it meets ALL requirements and planning rules that have been established.
- When the **Enforce All Rules** options is NOT marked, students can save their plan without meeting all requirements, but all planning rules must still be met. Warning messages from failed requirements and failed planning rules display so users can see the issues but still save the entry.

Warnings and Alerts

## Add Courses to a Plan Template

Only one template can be created per program.

The courses display based on the selected calendar in the Campus toolbar. To load courses from another calendar, change the **Calendar to select courses from** selection. Only calendars in which the program is available are available for selection (School selection is populated on the Graduation or Career Tech Programs tab, or the program is available for all schools in the district).

1. Click in the text box below the number of credits for a certain grade level. Active courses meeting that credit type display for selection.
2. Choose the desired course(s). When they are added, they display the same way a planned course does and the number of credits is updated. The credits assigned to a course appear after the course name.
3. Add enough credits for future years as needed.
4. Repeat these steps for each credit type. At the end of the process, the student should have a clear idea of what courses need to be taken in each grade level to meet the requirements of the assigned program.
5. Click the **Save** icon when finished.

Click the X next to any added course that does not need to be on the Plan Template. Click the **Clear Template** button to remove ALL courses from the grid.
