Tool Search: MSDS Extracts

The Teacher Student Data Link is an extract in the Michigan Student Data System (MSDS) tool that reports links between students and the teachers who instruct them. This collection is necessary to meet the requirements of the American Recovery and Reinvestment Act (ARRA) and the America Competes Act as part of the State Fiscal Stabilization Fund.

This is a full-year collection, reporting data that reflects students' performance throughout the current academic year and their statuses at the end of the school year.

Michigan Teacher Student Data Link Extract Editor

Report Logic

Requirement

Report a record per student if the student is enrolled in one or more courses on or between the date range of the extract editor. If the student is scheduled in more than 1 calendar, report one record per calendar. If a student has no course information to report, the student should be excluded from the extract.

StudentCourse - SCED Subject Area and SCED Course Identifier must be = NOT NULL. Courses with no NCES code should not be reported in the extract.

StudentCourse - A student must have a Score on a State Reported Grading Task or Standard to report a record. If no Score is found, that particular course should not be reported for the student. If the student dropped the course but still has a Score, a record should still be reported.

Requirement

Grading Task or Standard must have the following:

- State Reported = selected
- Code = TSDL

OR

- State Reported = selected
- Code = CC64b

Reports a StudentCourse component for each Term the student receives a Grade on the reported grading task.

Only one grading task or standard should be reported per course. If both are found on a course report first from grading tasks, then standards.

Exception - Student w/o UICs

If Students w/o UICs = selected, report all students with a saved Score AND a State ID = NULL.

Exception - Missing Scores

If Pull Missing Scores Only = selected, report all State Reported Grading Task students with a Score = NULL.

Do NOT report students that have a saved Score = NOT NULL.

Exception - New Migrant Students

If New Migrant Students = selected, report all students actively enrolled in a migrant program whose program Start Date occurs on or between the Previous Count Date and the Count Date of the extract editor.

Program has a Code = MIGRANT and State Reported = selected.

Report StudentCourse / CompletionStatus = OE

Course must have a grading task marked as State Reported and Code = TSDL

Exception - Exited Migrant Students

If Exited Migrant Students = selected, report all students actively enrolled in a migrant program with a program End Date that occurs on or between the Previous Count Date and the Count Date of the extract editor.

Program has a Code = MIGRANT and State Reported = selected.

Course must have a grading task marked as State Reported and Code = TSDL

Filter results by student using Ad Hoc droplist on the extract editor.

HTML and CSV Formats report one record per student per course enrolled. A student can have multiple records reported.

File Naming Convention: TeacherStudentDataLink.XML

Report Editor Fields

The following table describes the fields available in the extract editor.

Editor Field	Description
Extract Type	The type of extract being generated. In this case, select <i>Teacher Student Data Link</i> .
Count Date	The date on which the information in the report is valid.
Previous Count Date	The last date on which the report was run.
Students w/o UICs	Indicates if students who don't have identification numbers should still be included in the report.
Pull Missing Scores Only	If marked, only students with a State Reported Grading Task with a Score of null are included in the report.
New Migrant Students	Limits the students reported to only those enrolled in an active Program with a Code of MIGRANT and State Reported selected.
Exited Migrant Students	Limits the students reported to only those actively enrolled in a Program with a Code of MIGRANT that has an End Date on or within the Previous Count Date and Count Date.
Submitting Entity	Describes the entity submitting the extract to the state.
Reporting Window	Indicates if the extract is generated for an entire <i>School Year</i> or as a <i>Mid-Year</i> report.
Format	The format in which the report will be generated. Use <i>State Format (XML)</i> for submission to the state and HTML or CSV for data review and verification.
Ad hoc Filter	Use this to select a previously created ad hoc filter to specify the report population further. When an Ad hoc Filter is selected, the report is based on the options selected in the editor, not the Campus toolbar.
Validate	Marking this checkbox will validate the XML data to ensure its accuracy. If errors are found, the extract will list them for correction based on the schema.
Include Protected Identity Info	Reports Demographics information from Census > People > Identities > Active Identity > Protected Identity Information.
Calendar(s)	The calendars for which data will be included in the report.

Generating the Teacher Student Data Link Extract

1. Select *Teacher Student Data Link* as the **Extract Type**.
2. Enter a **Count Date** *mmddyyyy* format or click the calendar icon and select a date.
3. Enter a **Previous Count Date** in *mmddyyyy* format or by clicking the calendar icon and selecting a date.
4. Indicate if **Students without UICs** should still be included in the extract.
5. Indicate if only students who have a State Reported Grading Task with no score should report by marking the **Pull Missing Scores Only** checkbox.
6. Indicate the **Submitting Entity** of the extract.
7. Mark **New Migrant Students** to only report students in a Migrant program.
8. Mark **Exited Migrant Students** to only report those who have exited a Migrant program within the Count Date window.
9. Select the **Reporting Window** for which the extract is being generated.
10. Select the **Format** in which the report should be generated.
11. Select an **Ad hoc Filter** to determine what students appear in the extract. When an Ad hoc Filter is selected, the report is based on the options selected in the editor, not the Campus toolbar.
12. Mark **Validate** to verify XML data.

For guidance in validating the XML file against your state's schema using a free, third-party program, see the [Validating an XML File Against a Schema File](#) article.

13. Indicate if the extract should **Include Protected Identity Info**.
14. Select the **Calendar(s)** to include in the extract.
15. Click **Generate Extract** to generate the report in the indicated format or **Submit to Batch** to schedule when the report should generate.

Users can submit a report request to the batch queue by clicking **Submit to Batch** instead of Generate Extract. This process allows larger reports to be generated in the background without disrupting the use of Campus. See the [Batch Queue](#) article for more information about submitting a report to the batch queue.

Teacher Student Data Link Report Layout

If the **Include Protected Identity Info** checkbox is marked in the extract editor, Demographics fields report from Census > People > Identities > Active Identity > Protected Identity Information.
