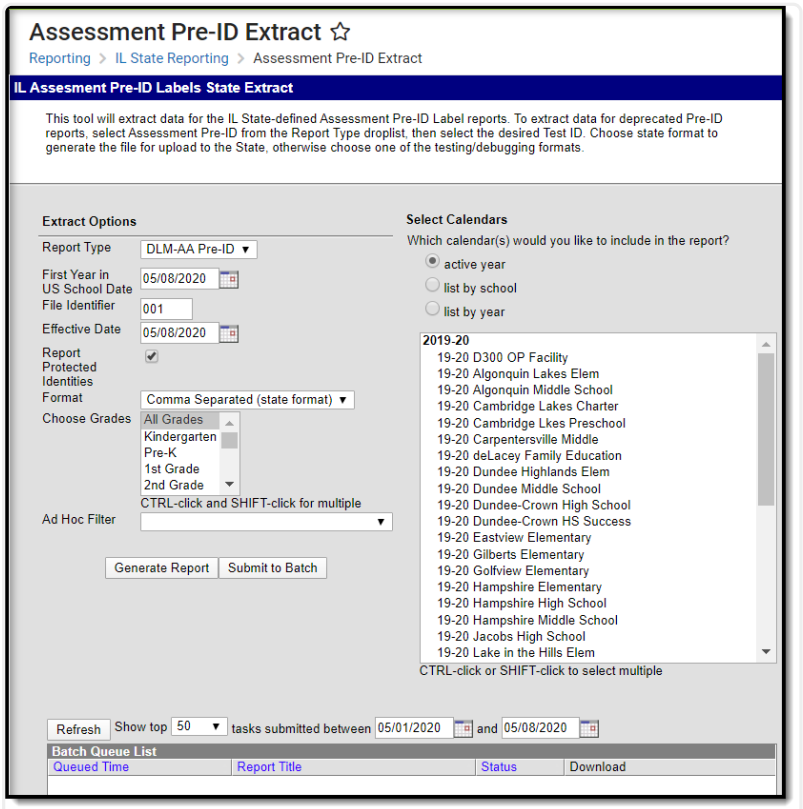
Tool Search: Assessment Pre-ID Extract

The DLM-AA Pre-ID Extract replaces the Illinois Alternate Assessment Extract. The DLM-AA is an adaptive computer-based assessment for students who have the most significant cognitive disabilities and is aligned to the Common Core Essential Elements in ELA and Math.



DLM-AA Pre-ID Extract Editor

Report Logic

All students who have an active primary enrollment as of the effective date and who meet the following requirements are included in the report:

- Students must be enrolled in a State Grade of 03-12.
- The enrollment record must have the IL Alt Assessment checkbox marked.
- If there is more than one enrollment that meets these requirements, the enrollment with the most recent start date reports.
- Enrollments marked as No Show or State Exclude do not report.

Report Editor Details

The following fields are available for selection:

Field	Description
Report Type	Selection determines which Pre-ID Extract generates. Choose **DLM-AA Pre-ID**.
First Year in US School Date	Entered date returns students who were first enrolled in a US School on or after this date. It defaults to the current date, but can be modified by typing in *mmddyy* format or using the calendar icon to select a date.
File Identifier	This field is reported each time the district submits an extract. This number will default to 001 and increase sequentially.
Effective Date	The entered date is used to include students who are actively enrolled in the selected calendars as of that date.
Report Protected Identities	When marked, student identity information (last name, first name, etc.) reports from the Protected Identity Information fields.
Format	This extract can be generated in the State Format (Comma Separated), HTML or XML. Use the State Format option after data has been reviewed for accuracy in one of the other formats.
Choose Grades	Selection indicates which grade level of enrollment will be returned in the extract. Choose All Grades to include enrollments from all grade levels.
Ad hoc Filter	Select an existing Ad hoc filter to further limit the students included. Only those students meeting the criteria of the selected Ad hoc filter and the report logic will be included in the report. If a grade level and an Ad hoc filter is selected, only students who are in the selected Grade Level and in the Ad hoc Filter will be included on the report.
Select Calendars	At least one calendar needs to be selected in order to generate the report. Calendars can be selected by the Active Year, by School or by Year. If a calendar is selected in the Campus toolbar, that calendar is automatically selected.
Report Generation	Use the **Generate Extract** button to immediately display the results of the extract. For a larger data set, use the **Submit to Batch** button. This allows the selection of a specific time in which the extract generates (after school hours). See the Batch Queue article for more information.

Generate the Report

1. Select the **DLM-AA Pre-ID Report Type**.
2. Enter the **First Year in US School Date** in *mmddyy* format, or use the calendar icon to select a date.

Copyright © 2010-2024 Infinite Campus. All rights reserved.

3. Enter the appropriate **File Identifier**.
4. Enter an **Effective Date** in *mmddyy* format, or use the calendar icon to select a date.
5. If desired, mark the **Report Protected Identities** checkbox.
6. Select the appropriate **Format** in which to generate the report.
7. Select the appropriate **Grade levels** to include on the report.
8. If necessary, select an **Ad hoc Filter**.
9. Select the appropriate **School Calendars** for which to generate this report.
10. Click the **Generate Report** button or the **Submit to Batch** button. The report will appear in a new window in the chosen format.

The report sorts in Last Name, First Name, State ID order.
