[Student Waiver Information in Ad hoc Query Wizard](#) | [Create Custom Waiver Fields](#) | [Add New Waiver Types](#) | [Add Student Waiver Data](#) | [Documents](#)

Tool Search: Waiver

The Student Waiver tool allows schools to track a student's non-participation in something, or a variance in what the student receives. Some states could use this to track technology use or field trip permission, or perhaps non-participation in a science experiment. It is up to the district how this tab is used, if at all.

Fields are added by the district on the Attribute/Dictionary and mimics the behavior of a custom tool.

Because there are other areas in Campus that track exemptions or waivers, it is best to not duplicate efforts. The following is a list of these areas.

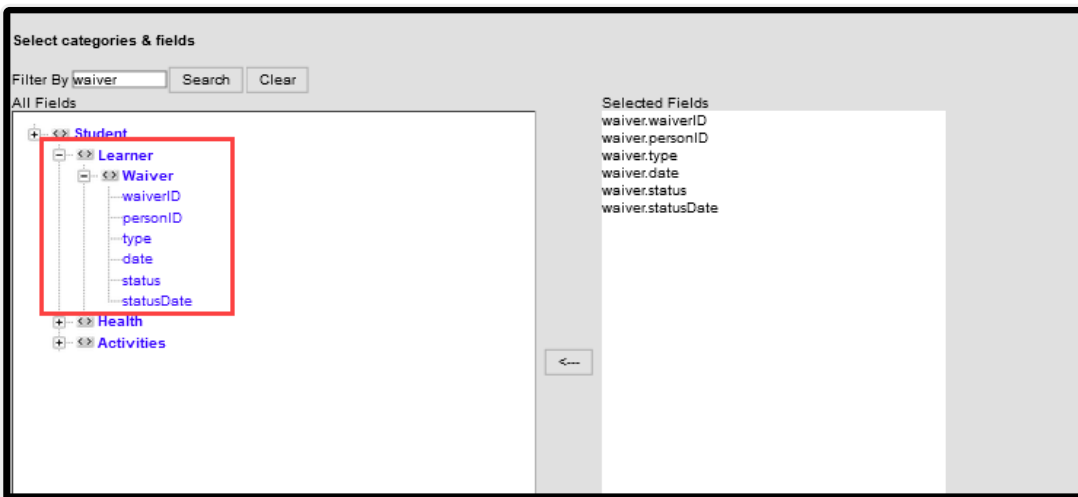

- Health Waivers - these types of conscientious objections are noted when adding vaccinations to students on the [Student Health Immunizations](#) tab.
- Test Accommodations - (if available in your state) these types of waivers are part of state

reporting extracts.

- ELL or other services the student may receive - these types of denial of service are tracked on the student's [Programs](#) or [Special Education](#) documents.
- Exempt Fees - if students are exempt from paying certain fees due to income restrictions, mark the fee as exempt on the student's [Fees](#) tab.
- FRAM Opt Out - check the [FRAM Preferences](#) tool for information on using Display Medicaid Opt Out and Display SCHIP Opt Out.
- Activities/Sports - track student eligibility for sports participation on the [Athletics](#) tab.

Student Waiver Information in Ad hoc Query Wizard

Waiver information is available in the Query Wizard for Student data types in the **Learner > Waiver** folder.

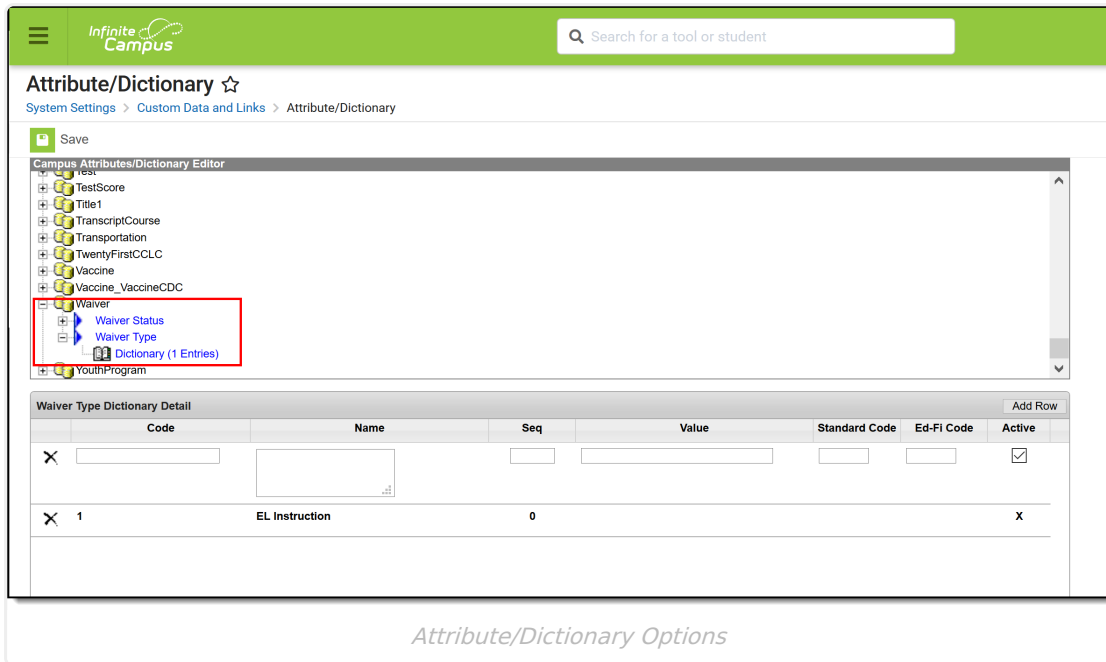

Student Waiver Ad hoc Fields

The field **waiver.type** returns the code/number assigned to the Waiver Name; the field **waiver.status** returns the code/number of the field Granted?.

Create Custom Waiver Fields

The options available when adding a new Waiver for a student depend on the items added in the [Attribute/Dictionary](#). Additional fields cannot be added, but the Dictionary items (what is selected for the fields) can be modified.

Only new Dictionary items can be added. New fields cannot be added, and fields cannot be renamed or removed.

Add New Waiver Types

In addition to the current one available (EL Instruction), a new waiver is needed.

1. Navigate to the **Attribute Dictionary** (System Administration > Custom > Attribute/Dictionary)
2. Expand the **Waiver** option at the end of the scroll.
3. Expand the **Waiver Type** item.
4. Select the **Dictionary** list.
5. Click the **Add Row** button in the right hand corner.
6. Enter a **Code** and a **Name** for the new waiver.
7. If desired, enter a **Sequence**, **Value** and **Standard Code**.
8. Mark the new waiver as **Active**.
9. Click the **Save** icon when finished.

Add as many waivers as needed by clicking the **Add Row** and populate the new fields as noted above.

The new Dictionary List includes the newly added waivers, and if they are marked Active, are available to select on the Waiver tab.

Add New Waiver Status

The Waiver Status (whether a waiver was accepted or denied) may need additional options as well.

1. Navigate to the **Attribute Dictionary** (System Administration > Custom > Attribute/Dictionary)
2. Expand the **Waiver** option at the end of the scroll.
3. Expand the **Waiver Status** item.

4. Select the **Dictionary** list.
5. Click the **Add Row** button in the right hand corner.
6. Enter a **Code** and a **Name** for the new waiver.
7. If desired, enter a **Sequence, Value** and **Standard Code**.
8. Mark the new waiver as **Active**.
9. Click the **Save** icon when finished.

Add as many waivers as needed by clicking the **Add Row** and populate the new fields as noted above.

The new Dictionary List includes the newly added waiver status, and if they are marked Active, are available to select on the Waiver tab.

See the available [Custom](#) articles for more information on tailoring Campus fields and tools to meet the needs of a district.

Add Student Waiver Data

Assign Waiver Information

1. Select the **New** icon. A **Waiver Detail** editor displays.
2. Select the desired **Waiver** from the dropdown list (required entry).
3. End the **Date** the waiver was added (required entry).

Assign Waiver Status

1. Select the appropriate option for whether the waiver was accepted or denied.
2. Enter the date the waiver was accepted or denied.
3. Click the **Save** icon when finished. The new Waiver is listed in the Waiver table in order of the date the waivers were assigned.

Documents

To view documents, click the **Documents** button on the action bar. See the [Student Person Documents](#) article for more information.
