Tool Search: Grade Level Age Setup

The Grade Level Age Setup tool ensures students are being enrolled into the appropriate grade level based on their date of birth and age. When information is added to a grade level, informational warnings display to those enrolling students (building secretaries, counselors, registrars, etc.) stating the selected grade level may not be appropriate.

## Things to Know

- The list of grade levels is populated from the [Grade Level Definitions](#) list, which only allows

users at the state or district level to modify existing grade levels. When new grade levels are needed, contact Campus Support for guidance.

- Grade level ages need to be entered at the district level. This applies the age to all schools in the district. Verify there is no school selected in the Context editor (toolbar).
- Grade level ages automatically roll forward from year to year when using the Calendar Wizard.
- Grade level age restrictions can be overwritten by marking the **Exclude from Grade/Age Validation** checkbox on the [Grade Levels](#) editor.
- Age parameters in State Edition installations cannot be published to District Edition.
- Grade levels must be mapped to a State Grade Level. This is done on the [Grade Levels](#) tool (State Grade Level Code). Once that field is populated, the mapping rolls forward with the calendar.

## Grade Level Age Editor

Field	Description
<b>Name</b>	Displays the name of the grade as entered on the Grade Level Definitions tab. This field cannot be modified.
<b>Description</b>	Displays the description of the grade as entered on the Grade Level Definitions tab. This field cannot be modified.
<b>Minimum Age</b>	<p>Indicates the lowest possible age the student can be for enrollment into the selected grade.</p> <p>This entered value must be lower than the entered value for the Maximum Age field.</p> <p>This field is not required. However, when the Cutoff Date option is set to <b>Enter Cutoff Date</b>, the Minimum Age field OR the Maximum Age field must be populated.</p>
<b>Maximum Age</b>	<p>Indicates the highest possible age the student can be for enrollment into the selected grade.</p> <p>This entered value must be higher than the entered value for the Minimum Age field.</p> <p>This field is not required. However, when the Cutoff Date option is set to <b>Enter Cutoff Date</b>, the Minimum Age field OR the Maximum Age field must be populated.</p>

Field	Description
<b>Cutoff Date</b>	<p>Determines what value is used to verify the appropriate grade level for the student's age.</p> <ul style="list-style-type: none"> <li>• <b>Use First Instructional Date</b> - calculation is based on the first <a href="#">calendar day</a> marked as Instruction.</li> <li>• <b>Enter Cutoff Date</b> - calculation is based on the date entered in the mm/dd field. This date may be a district preference or a state mandate (September 30, First Friday, etc.). When the cutoff date is July 1, enter 07/01.</li> </ul>

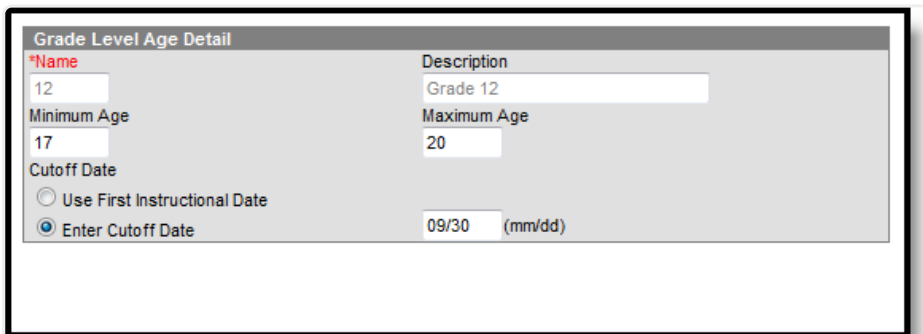

## Assign Age to Grade Level

1. Select a grade level from the Grade Level Age Editor. A **Grade Level Age Detail** editor displays.
2. Enter the **Minimum Age** for the grade level.
3. Enter the **Maximum Age** for the grade level.
4. Select the **Cutoff Date** option, either **Use the First Instruction Date** or **Enter a Cutoff Date**.
5. When using **Enter a Cutoff Date**, enter the appropriate date for the grade level in mm/dd format (i.e., July 1 = 07/01).
6. Click the **Save** icon when finished.

## Verify Age Level is Enforced

When the Grade Level Age fields are populated, and the Grade Level is not marked to exclude this verification, the process of enrolling a student alerts the user when the entered birth date of the student does not meet the requirements of the grade level.

In the following example, a registrar at the Central Enrollment Office is using the Student Locator to enroll a new student as a senior in the local high school. Grade 12 has been set to have a minimum age of 17 and a maximum age of 20, with a cutoff date of September 30.

*Grade Level Age Detail*

The registrar enters the student's birth date as 09/01/2001, which is an incorrect date (it should be 09/01/1999). However, the registrar does not notice this error. After selecting the Grade level of 12, a warning displays indicating the student has not reached the minimum age for enrollment in

that grade level.

The screenshot shows the 'Identity Info' and 'Enrollment Detail' sections of the Infinite Campus system. In the 'Identity Info' section, the 'Birth Date' field is highlighted with a red box and contains the value '09/01/2001'. In the 'Enrollment Detail' section, the 'Grade' field is highlighted with a red box and contains the value '12'. A red arrow points from the 'Birth Date' field to a warning message box that says 'Student has not reached the minimum age of 17 for Grade 12 by the required date of 09/30/2015.' The warning message box has an 'OK' button.

*Grade Level Age Verification Warning*

The registrar can click the OK button to continue enrolling. It is expected the registrar changes the student's birth date to the correct year, but it is not necessary. The enrollment can still be created and saved with the incorrect birth date. Then, the registrar can generate the [Age/Grade Level Exception Report](#) to view potentially incorrect student birth dates and enrollment grade levels.
