Tool Search: English Learners

The English Learners (EL) tools allow users to manage student EL programs, assessments, services, and accommodations. It provides a central location for managing EL information, such as the date the student was identified as EL, when the student entered/exited an EL program, when the student is expected to leave an EL program, and First Year/Second Year Monitoring data.

For students who have exited and/or re-entered an EL program, a historical record is maintained and displayed, and can be viewed in both State and District Editions of Infinite Campus. The information provided below is specific to the state of **Texas**. See the core English Learners (EL) article for information on necessary tool rights, available Ad hoc fields, and guidance on adding and printing Early Learning records.

English Learner data reports in the following Ed-Fi Resources:

- Student Education Organization Associations
- Student Language Instruction Program Associations
