The Grades tool displays a student’s academic performance by enrollment and course. It shows In-Progress grades, Posted grades, and calculated GPAs. Grade data is read-only and reflects information entered elsewhere in Campus.

GPA and Grade data are populated in this tool from different areas of Infinite Campus. The data **cannot** be modified via this tool.

How grades are calculated and displayed

This section explains the system behavior behind grade calculations. Because grade and GPA data originate in other Campus tools, the Grades tool functions strictly as a read-only display.

- **In-Progress** grades are calculated in real time from assignment scores using Grade Calculation Options set by the:
 - [Course](#)
 - [Course Master](#)
 - [Teacher](#)
- **Posted** grades are finalized and recorded by staff using grading tools:
 - [Grade Book](#)
 - [Progress Monitor](#)
 - [Post Grades](#)
 - [Grading by Task / Grading by Student](#)
- GPAs are calculated separately using district-defined GPA calculation rules.

3. Expand the GPA section to see additional details.

Custom GPAs must be enabled using the [Calendar GPA Calculation Setup](#) tool. When Custom GPAs are enabled, Rolling Cumulative GPAs do not display. See the [GPA Calculations in Campus](#) article for more information about how GPAs are calculated.
