## [Other Districts Information](#)

Tool Search: Other Districts

The Other Districts tool in the District Information tool stores the contact information of other districts in the state. The District Name, Number, and Type is populated based on state-provided information. District Contact information can be modified and saved by personnel with the necessary [Tool Rights](#).

The Other Districts tool is only for entering information of other districts for use in the Notice of Change in Enrollment report. Any changes made to the Other Districts tool are **only** for the current user's district site, not any of the other district sites.

District information reports from the fields on the District Information tool, **not** from the Other Districts tool. Any changes made to the District Information tool are only for the current user's district site, **not** any of the other district sites.
