

User Security Tool Rights

Last Modified on 12/18/2024 12:57 pm CST

Tool Rights determine the level of access users have to tools throughout Campus. This article refers to tool rights in abbreviated form (i.e., R, W, A, D or any combination of the four).

Only users with a Student Information System product security role are allowed to modify User Security tools.

Image 1: User Security Tool Rights

Right	R	W	A	D
Users Security	User is only able to view existing User Account values (except password). In order to W(rite), A(dd), or D(elete) values for these tools, users must have an Student Information System (SIS) product security role.			
Users				
User Account				
User Groups	Only users with the Student Information System (SIS) or Student Information System - Group Assignment product security roles can access this tool.			
LDAP Authentication	Only users with a Student Information System (SIS) product security role can access these tools. Users who have an SIS product security role have full RWAD tool rights for these tools.
