

Immunization Batch Report (Montana)

Last Modified on 12/14/2025 8:45 pm CST

[Report Logic](#) | [Report Editor](#) | [Generate the Immunization Batch Report](#)

Tool Search: Immunization Batch

The **Immunization Batch Report** provides a view of selected students' immunizations. The Immunization Batch report uses data that is entered on a student's Immunization tab. Data should be up to date on this tab for the report to appear correctly.

In order for the report to generate, all individuals included in the report must have a birth date entered on their Identity record. If a birth date is not entered, an error message displays after generating the report.

The screenshot shows the 'Batch Immunization Report' page. At the top, there is a navigation bar with the Infinite Campus logo and a search bar. Below the navigation bar, the title 'Immunization Batch' is displayed, along with a 'Health > Reports > Immunization Batch' breadcrumb trail. The main content area is titled 'Batch Immunization Report' and contains the following fields:

- Which students would you like to include in the report?
 - Grade (selected)
 - Ad Hoc Filter
- Grade dropdown menu showing options: All Students, 09, 10, 11, 12.
- Enrollment Effective Date: 04/14/2020.
- Report Type: State Specific (selected), General.
- Sort Options: Student Name (selected), Grade.

At the bottom of the report area, there are 'Generate Report' and 'Submit to Batch' buttons. Below the report area, there is a 'Batch Queue List' table with columns: Queued Time, Report Title, Status, and Download. The table is currently empty. The bottom of the page has a footer with the text 'Immunization Batch Report'.

This is a very complex report, so try to limit the number of students run per batch.

Report Logic

This report lists every student in the selected grade level and their immunization records that have been entered on the Student Health [Immunizations](#) tool.

Report Editor

The following fields are available.

Fields	Description
Student Selection	Choose students either by a Grade Level or an Ad hoc Filter . If by grade level, the list of grades is limited to those grade levels in the selected calendar in the Campus toolbar. If by ad hoc filter, only those students in the filter who are actively enrolled as of the entered enrollment effective date will be included in the report.
Enrollment Effective Date	Entered date returns immunization information for students who are actively enrolled as of that date. Dates are entered in mmddyy format or can be selected by using the calendar icon. If this field is left blank, the report uses the start and end dates of the selected calendar. This field defaults to the current date.
Report Type	State Specific - This option generates the student's information in the State of Montana Child Care Facility/School Certificate of Immunization format. General - This option generates the Immunization Summary Report which details the student's immunization dates and compliance for each vaccine.
Sort Options	The report can be sorted alphabetically by Student (last) Name or by Grade level, with the lowest grade level printing first.

Generate the Immunization Batch Report

1. Select the students to include in the report by selecting a **Grade Level** or an **Ad Hoc Filter** from the dropdown lists
2. Enter an **Effective Date** for the report.
3. Select the **Sort Options** for the report.
4. Click the **Generate Report** button.

The report will display in a PDF document listing the immunizations for the students in the selected calendar.

Student , Kevin M
ID: 721 Grade: 08
Birthday: 05/01/1995

Immunization Summary Report
