

Core Attribute Dictionary

Last Modified on 03/06/2026 3:00 pm CST

Tool Search: Core Attribute Dictionary

The Core Attribute/Dictionary tool shows all core fields and code values created for the current Release Pack version and localized for the applicable district or state.

Attribute/Dictionary vs. Custom Attributes

The purpose of the Attribute/Dictionary tool is to view all core elements in the application by state and district. Locally created elements can be created, viewed, and modified in the [Custom Attribute](#) tool.

See the [Custom Data and Links Tool Rights](#) article for information about tool rights for this and related tools.
