The CAASPP (California Assessment of Student Performance and Progress) consists of seven different layouts that are aimed to assist teachers, administrators, students and parents for success through quality teaching and learning using a variety of approaches and item types.

Infinite Campus is not responsible for the assessment layouts. Please refer to the [CAASPP](#) or [ELPAC](#) sites for specific layout information.

The CAASPP Import has logic to create Test Detail structure records when you do not already have the test available in [Assessment Center](#). It creates the basic fields required for import - Name, Code, Assessment Type, Test Type, Score Fields and Result Status. **When you would like more information for the Test Detail structure record, you can either modify the data after using the import or create your own record prior to using the CAASPP Import.**

See the [CAASPP Import](#) article for information on using the Import tool.

## ELPAC Import Types

[ELPAC Summative Import Type](#) | [ELPAC Initial Import Type](#)

The ELPAC (English Language Proficiency Assessments for California) is used to assess English proficiency for students whose Primary Home Language is NOT English for students in grades K-12. This assessment replaces the CELDT as of 2018, and is aligned with the 2012 California English Language Development Standards.

This assessment is two separate tests - (1) initial identification of students as English Learners, referred to as the **ELPAC Initial**; (2) annual summative assessment to measure a student's progress in English and to identify the student's proficiency, referred to as the **ELPAC Summative**.

Both ELPAC and IELPAC includes six "child" layouts - Listening, Oral, Reading, Speaking, Writing and Written.

When the Import file contains an English Learners (EL) record for the student, but there is no such record in Campus, an English Learners (EL) record is created for that student. Existing EL data is NOT overwritten.

When a student does not have an assigned Primary Home Language on their EL record, the import process also adds this value for the student when it exists in the import file.

The following information details the what fields are created when using the Import to create a Test Setup record for each assessment included in the ELPAC Import.

## ELPAC Summative Import Type

When importing assessments to a newly created Test Setup record, the following items are marked on the Test Setup Detail:

**Note that including the year in the test name is a district preference.** Tests can be set up as a single parent test to categorize EVERY version of the test. To break the tests out by a specific year, include the year in the title of the parent test. The layouts below do not include the year.

The ELPAC child tests do not include dates in the import file, but dates are an option on the Test Setup editor, when districts choose to add that information manually.

Sample Assessment File Layout

Conversion or mapping does not need to be done to use the CAASPP Import. When you do want to convert the caret-delimited file to a more readable format, follow these steps:

1. In the file, highlight **Column A**.

	A	B	C	D	E	F	G
1	Assessment Type	^	UIN (Unique Identification Number)	^	Blank 1	^	Blank 2
2	SA^1124876	^	^123456789^123456	^	STUDENT^ANDREW^S	^	2010-11-16
3	SA^2556214	^	^23456789^23456	^	STUDENT^ANDREA^A	^	2010-12-01
4	SA^2380066	^	^434567890^3	^	STUDENT^BARTHOLOMEW^	^	2011-07-11
5	SA^2976606	^	^456789012^456789	^	STUDENT^BRIANA^	^	2011-07-11

2. In the header of Excel, navigate to the **Data** tab and choose **Text to Columns**.

3. On the pop-up editor, select the **Delimited** radio button, and click **Next**.

Convert Text to Columns Wizard - Step 1 of 3

The Text Wizard has determined that your data is Delimited.  
If this is correct, choose Next, or choose the data type that best describes your data.

Original data type

Choose the file type that best describes your data:

☒ Delimited - Characters such as commas or tabs separate each field.

☐ Fixed width - Fields are aligned in columns with spaces between each field.

4. Change the Delimiter from **Tab** to **Other** and enter ^ into the text field. Click **Next**.

Convert Text to Columns Wizard - Step 2 of 3

This screen lets you set the delimiters your data contains. You can see how your text is affected in the preview below.

Delimiters

☐ Tab

☐ Semicolon

☐ Comma

☐ Space

☒ Other: ^

☐ Treat consecutive delimiters as one

Text qualifier: " " v

Convert Text to Columns Wizard - Step 3 of 3

This screen lets you select each column and set the Data Format.

Column data format

☒ General

☐ Text

☐ Date: MDY v

☐ Do not import column (skip)

'General' converts numeric values to numbers, date values to dates, and all remaining values to text.

The ELPAC Initial file is sent in an Excel file. Before importing, the first row (see highlighted text in the image below) needs to be removed.

Initial ELPAC File

Then, the file can be saved to a CSV format.

1. In Excel, go to the **File** tab and choose **Save As**.
2. Select the desired location for where the file should be saved.
3. In the Save As dialog, rename the **File Name** if desired, and change the Save as Type to be **CSV (Comma delimited)**. There are other CSV options that may be listed - CSV (Macintosh) and CSV (MS-DOS).
4. Click **Save**.
5. Once in CSV format, it can be imported.
