Understand the Access Log

Data captured for each user login attempt is as follows:

Field	Description
Timestamp	<p>Login date and time.</p> <p>You can filter this column by a specific date or see all data before or after a specific date</p>

Field	Description
Success	Indicates whether or not the user was successful in logging into their account.
Remote IP	Source IP address.
Balancer Header	Indicates the load balancer the user used to log into Campus.
Remote Browser	Operating system and browser combination used.
App Server	Application server of login attempt.
Third Party Admin	Indicates that another user (with equivalent or greater administrative rights) has used the Login As User button to log into Campus as this user. This column reports the other user's name, user ID and username.
