

View and Manage Notifications

Last Modified on 01/16/2026 2:38 pm CST

Location: Notification Bell

Notifications are short, informational messages. See the [Process Alerts](#) article for more information about types of notifications sent to other types of Campus users.

Access notifications by clicking on the bell icon.

Notifications are listed below a link to the Message Center.

Some notifications are text only, while others are links to additional information. Notifications with additional information are indicated by a > symbol on the right margin of the notification, as shown in the image above. When hovering over a clickable notification, your mouse pointer changes to a hand icon and the notification changes color.

Notifications are shown for 30 days and are deleted at 2:00 AM on the 30th day.

Teachers who also use [Campus Parent](#) may see notifications that cross platforms if they use the same account to access both applications. Portal notifications may display in Instruction and vice versa.
