

# NJSLEDS Student Course Data

Last Modified on 02/02/2026 3:23 pm CST

## Tool Search: NJSLEDS Extracts

The Student Course Data extract reports one record for each course in which a student has received a final score. Records report based on selections made on the NJSLEDS Extract editor. When a student exits and re-enters the same course, this is treated as two separate records.

The screenshot shows the 'NJSLEDS Extracts' tool interface. At the top, a header bar displays 'NJSLEDS Extracts ☆' and navigation links: 'Reporting' > 'NJ State Reporting' > 'NJSLEDS Extracts'. The main content area is titled 'NJ SLEDS File Extract' with a sub-instruction: 'This tool will extract data to complete the New Jersey Statewide Longitudinal Education Data System (NJSLEDS) reporting extract for October and December or EOY. Choose the State Format (CSV) to get the file in the state-defined CSV file format; otherwise choose HTML or PDF for testing/debugging. Each extract contains a 1 line header.' Below this, a 'Snapshot Date' field is noted as 'can be obtained by entering the same date for the Reporting Period Start Date and Reporting Period End Date.' The 'Extract Options' section includes fields for 'Extract Type' (set to 'NJSLEDS Student Course Data'), 'Reporting Period Start Date' (set to '12/05/2025'), 'Reporting Period End Date' (set to '12/05/2025'), 'Students w/o stateIDs' (unchecked), 'Display Courses with No Final Grade' (unchecked), 'State Exclude' (set to 'Exclude State Exclude Enrollments'), 'Ad Hoc Filter' (empty), and 'Format' (set to 'State Format(CSV w/ header)'). The 'Select Calendar' section contains radio buttons for 'active year' (selected), 'list by school', and 'list by year'. A dropdown menu for 'School' is open, showing a list of schools under '25-26': Adams High School, Adams Middle School, Franklin School, Hoover School, Jefferson School, and Lincoln School. A note at the bottom of this dropdown says 'CTRL-click or SHIFT-click to select multiple'. At the bottom of the tool interface, the text 'NJSLEDS Student Course Data Extract Editor' is visible.

When the Display Courses with no Final Grade checkbox is marked, students who are not assigned a final outcome/score for the course (based on the report logic below) are included in the report, but the following report fields do not report any data:

- Credits Earned
- Numeric Grade
- Alpha Grade
- Completion Status

Marking this checkbox allows users to see which students do not have a final score assigned to them.

## Report Logic

For a record to report, the following conditions must be met:

- Course must be active at some point within the report start and end dates.
- Transcript record for course exists.

- Course must have a grading task.
- Student has been assigned a final outcome/score for the course.

A set of course records reports per student where the student was assigned a final outcome or score. A record will report for each transcript record when:

- GPA Weight field is not blank.
- Current Score field is not blank.
- Actual Term falls within the date parameters selected on the extract editor.

Manually added transcript postings will not be included in the report.

When these records do not exist, the report considers courses with a state-reported grading task set up and value(s) selected for the grading task. Records are reported for each grading task that has a value selected and falls within the date parameters selected on the extract editor.

- The Current Score field is not blank.
- The Actual Term falls within the date parameters selected on the extract editor.
- If a student enters, exits, re-enters, and exits the same course section again, the most recent entry/exit date is used.
- The Student Section Exit Date cannot be in the future.

Courses marked as 'State Exclude' are excluded.

Mark any grading tasks you want to report as **State Reported** in the [Grading Task](#). Use the term mask feature on the [Grading Tasks at the course level](#) to hide the task for certain terms.

## Elementary School Scenario

- Report a set of records for courses considered year-long and typically do not receive an official final grade.
- Standards-based courses may not have transcript records. These courses report based on the grading task setup.

Any course with a grading task marked as state-reported and a grade is selected reports. This means that if a year-long course should only report once, a value should only be selected for a grading task once (regardless of the number of terms the course runs). Typically, these courses are referred to as before secondary.

## Middle and High School Scenario

- Report a set of transcript records.
- Course records from the student's transcript, including scores/grades and GPA weights assigned, are considered.
- These records report credit and grading information, which is not expected when a course is

before secondary.

## Report Editor

Field	Description
<b>Extract Type</b>	Selection determines which extract is generated.
<b>Reporting Period Start Date</b>	Date determines the time frame of the extract, reporting only student data as of that date. Dates are entered in mmddyy format or can be chosen using the calendar icon.
<b>Reporting Period End Date</b>	Entered date determines the time frame of the extract, reporting only that student data as of that date. Dates are entered in mmddyy format or can be chosen using the calendar icon. The end date field is auto-populated with the current date.
<b>Students without state IDs</b>	When marked, students who have not been assigned a state ID will be returned, along with those who have been assigned a state ID.
<b>Exclude Cross-Site Data</b>	Cross-site section enrollment data is <u>not</u> included in the report when checked. <ul style="list-style-type: none"> <li>• <u>Cross-site enrollment</u> functionality must be enabled at the district level for the checkbox to display.</li> <li>• Defaults to checked.</li> </ul>
<b>Display Courses with No Final Grade</b>	When the Display Courses with no Final Grade checkbox is marked, students who are not assigned a final outcome/score for the course (based on the report logic below) are included in the report, but the following report fields do not report any data: <ul style="list-style-type: none"> <li>• Credits Earned</li> <li>• Numeric Grade</li> <li>• Alpha Grade</li> <li>• Completion Status</li> </ul> <p>Marking this checkbox allows users to see which students do not have a final score assigned to them.</p>
<b>State Exclude</b>	Droplist options include: <ul style="list-style-type: none"> <li>• Exclude State Exclude Enrollments (<i>default</i>)</li> <li>• Include State Exclude Enrollments</li> <li>• Only State Exclude Enrollments</li> </ul>
<b>Ad hoc Filter</b>	When selected, only those students in the filter will be included in the selected extract.
<b>Format</b>	<ul style="list-style-type: none"> <li>• HTML</li> <li>• CSV format (state format)</li> </ul>

Field	Description
<b>Calendar Selection</b>	Selection indicates from where the data is pulled.
<b>Generate Extract</b>	Selection displays the results of the extract immediately.

## Generate the Report

1. Select **NJSLEDS Student Course Data** from the **Extract Type** dropdown list.
2. Enter a **Reporting Period Start Date**.
3. Enter a **Reporting Period End Date**.
4. Mark the **Student w/o stateIDs** if those students should appear in the report.
5. If applicable, mark the **Display Courses with No Final Grade** checkbox.
6. Indicate the Format in which the report should be generated.
7. Click the **Generate Extract** button to generate the report in the desired format.
