## Tool Search: Foster Care

The Foster Care tool indicates whether a student is in Foster Care. A start and end date is associated with each instance of a Foster Care record. These records are not tied to student enrollments or calendars. Data syncs to state editions for all scoped years (current year, M1 and P1).

Fields vary by state. For states with existing enrollment fields that collect foster care information (South Dakota and Washington), this tool is not available. However, if a BIE school exists in these states, it is available and data syncs to NASIS.

The screenshot displays the Foster Care tool interface for a student named Abegg, Colton (Dill). The student's information includes Student #: 103667, Grade: KG, and DOB: 02/01/2018. The counselor is Deborah Axtman. The interface includes a navigation menu with options like Medical Condition(s), Hall Monitor, and Honors. Below this is a toolbar with actions: New, Save, Delete, Print Summary Report, and Documents. A filter dropdown is set to 'All'. A table lists Foster Care records with columns for Program Status, School of Origin, Start Date, End Date, and Created By. The table contains one record with Start Date 01/02/2024 and Created By Plainview Schools 01/15/2024. Below the table is a 'Foster Care Detail' form with fields for Start Date (01/02/2024), End Date, Program Status (01: Foster Care), School of Origin, and Comments. A 'Modified By' field shows Administrator, Demo 01/15/2024 01:43 PM. At the bottom, there are sections for State Defined Elements and District Defined Elements.

## Publish Foster Care Records from a State Edition to a District Edition

Foster Care records can be published for an individual student from a State Edition to a District Edition. This tool is only available to State Edition users.

### Publish Foster Care Records Tool Rights

Users must have at least **W**(rite) tool rights to the Publish Foster Care Records sub-right in order to use this tool.

## To publish foster care records from a State Edition to District Editions:

**Note the following:**

- Users must have statewide access to publish student records.
- There must be at least one state owned record for the student in order for the Publish State Foster Care Records icon to display.
- Only state owned records can be published.
- For State linked customers, the Owner column on both the State and District editions displays the district name if the record is a district owned record and 'State' if it is a state owned record. The Filter dropdown allows users to view all records, only state owned records, or only district owned records.

When data is published from the State Edition to DIS-linked District Editions, logic compares data from the State Edition versus the District Edition:

- Only State owned data is published down to districts.
- If the Foster Care record being published does not exist at the district, the Foster Care record is created at the district.
- If the Foster Care record being published exists at the district, data changes made at the State level are updated on the district record.
- If the Foster Care record being published exists at the district but no changes exist between the state and district record(s), no update is made.
- If the Foster Care record being published exists at the district but the record was deleted in the State Edition, the record is deleted at the district.

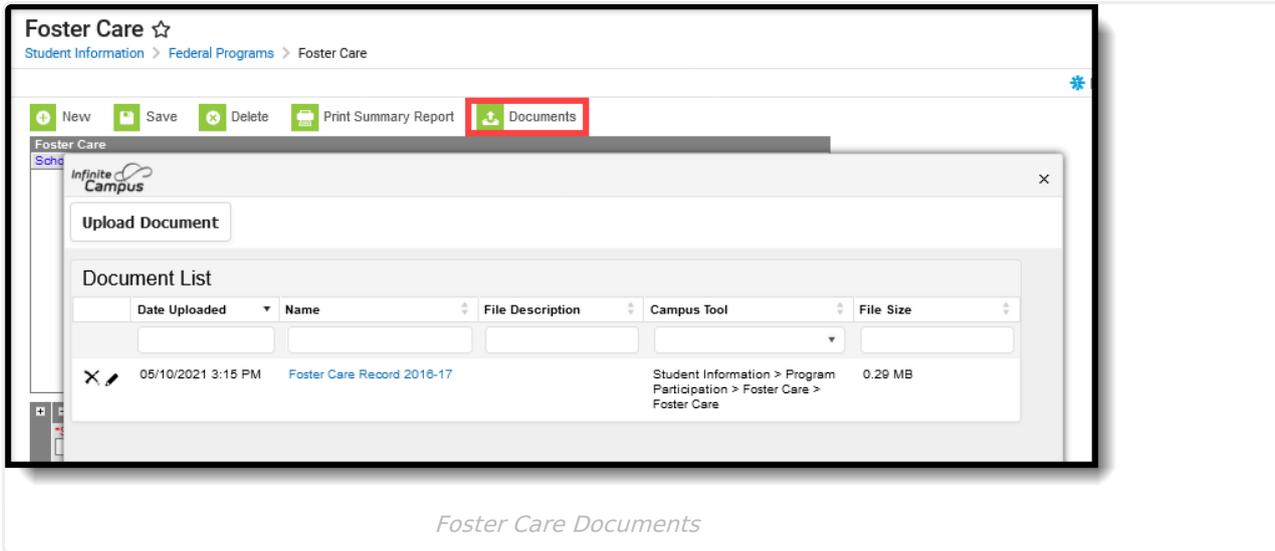

1. Click the **Publish State Foster Care Records** icon.
2. A message displays indicating the request has been submitted. Click **OK**.
3. A Foster Care record is created in the District Edition.

## Custom Tools

Users can create custom tabs for Foster Care in State and District editions. Custom tabs do not sync to the state edition from the district edition. Custom tabs are available in Ad hoc reporting.

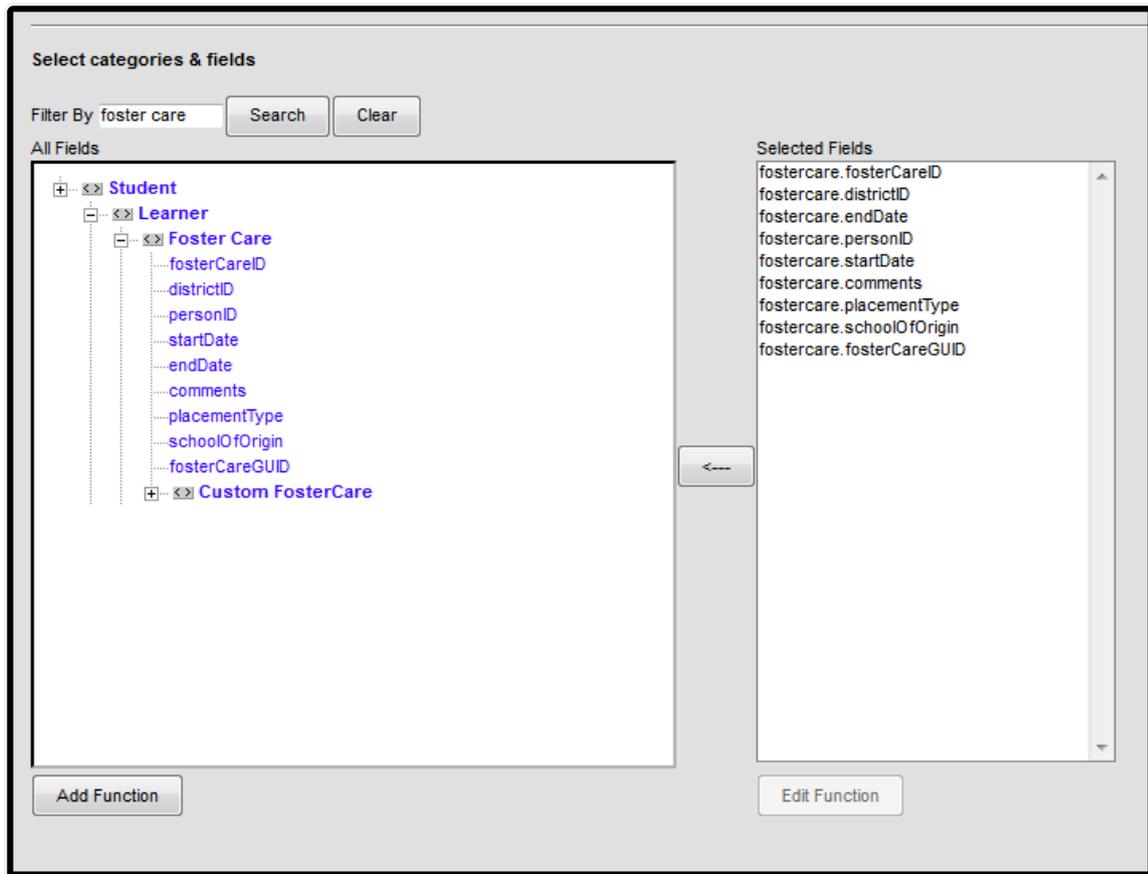

## Document Upload

To view or upload documents, click the **Documents** button on the action bar. See the [Student Person Documents](#) article for more information.

## Foster Care Ad hoc Reporting Fields

Create a report that pulls Foster Care elements in the Filter Designer using the **Student** Data Type. Foster Care elements are located in the **Student > Learner > Foster Care** folder.
