Tool Search: Foster Care

The Foster Care tool indicates whether a student is in Foster Care. A start and end date is associated with each instance of a Foster Care record. These records are not tied to student enrollments or calendars. Data syncs to state editions for all scoped years (current year, M1 and P1).

Fields vary by state.

For states with existing enrollment fields that collect foster care information (South Dakota and Washington), this tool is not available. However, if a BIE school exists in these states, it is available and data syncs to NASIS.

Publish Foster Care Records from a State Edition to a District Edition

Foster Care records can be published for an individual student from a State Edition to a District Edition. This tool is only available to State Edition users.

Publish Foster Care Records Tool Rights

Users must have at least \mathbf{W} (rite) tool rights to the Publish Foster Care Records sub-right in order to use this tool.

To publish foster care records from a State Edition to District Editions:

Note the following:

- Users must have statewide access to publish student records.
- There must be at least one state owned record for the student in order for the Publish State Foster Care Records icon to display.
- Only state owned records can be published.
- For State linked customers, the Owner column on both the State and District editions displays the district name if the record is a district owned record and 'State' if it is a state owned record. The Filter dropdown allows users to view all records, only state owned records, or only district owned records.

When data is published from the State Edition to DIS-linked District Editions, logic compares data from the State Edition versus the District Edition:

- Only State owned data is published down to districts.
- If the Foster Care record being published does not exist at the district, the Foster Care record is created at the district.
- If the Foster Care record being published exists at the district, data changes made at the State level are updated on the district record.

- If the Foster Care record being published exists at the district but no changes exist between the state and district record(s), no update is made.
- If the Foster Care record being published exists at the district but the record was deleted in the State Edition, the record is deleted at the district.
