## Title 1 Reading and Math Logic

### Title 1 Reading Logic

1. Reports "0" when:
  1. schoolAttribute.title1 assigned to a code of one of the following:

1. Targeted Assistance Eligible - No Program
  2. Schoolwide Eligible - No Program
  3. Not a Title I School
  4. Schoolwide Program
  5. Schoolwide Eligible - Targeted Assistance
2. The latest (most recent Effective Date) School History record with an Effective Date  $\leq$  the extract Effective Date, has:
2. When The latest (most recent Effective Date) School History record with an Effective Date  $\leq$  the extract Effective Date does not have a schoolAttribute.title1 assignment to one of the above codes:
1. Reports based on the code selected in the Title 1 Program field on the student's Title 1 tab when the following are true:
  2. Reports "1" when:
    1. Student has a Title 1 record with:
      1. Start Date  $\leq$  extract Effective Date
      2. End Date is null or  $\geq$  enrollment calendar Start Date
      3. Title 1 Program field = 1 or 3

### Title 1 Math Logic

1. Reports "0" when:
  1. schoolAttribute.title1 assigned to a code of one of the following:
    1. Targeted Assistance Eligible - No Program
    2. Schoolwide Eligible - No Program
    3. Not a Title I School
    4. Schoolwide Program
    5. Schoolwide Eligible - Targeted Assistance
  2. The latest (most recent Effective Date) School History record with an Effective Date  $\leq$  the extract Effective Date, has:
2. When The latest (most recent Effective Date) School History record with an Effective Date  $\leq$  the extract Effective Date does not have a schoolAttribute.title1 assignment to one of the above codes:
  1. Reports based on the code selected in the Title 1 Program field on the student's Title 1 tab when the following are true:
  2. Reports "1" when:
    1. Student has a Title 1 record with:
      1. Start Date  $\leq$  extract Effective Date
      2. End Date is null or  $\geq$  enrollment calendar Start Date
      3. Title 1 Program field = 2 or 3

### Free Lunch Logic

Reports from the School History record with the most recent Effective Date that is on or before the extract Effective Date (when Calendar Start Year is on or after the Provision Base Year and Calendar End Year is on or before the Provision End Year on the School History record).

This field reports as **1** in the following instances:

- When 2: Provision 2 or 3: Provision 3 and the NSLP checkbox are marked.
- When the student has an Eligibility record of Free with a Start Date on or before the extract

Effective Date and an End Date on or after the extract Effective Date.

- Where a *30-Day Carry-Over* is present, reports for a student who had an Eligibility of Free on the last day of their enrollment in the previous year calendar and the extract Effective Date is on or before 30 business days (beginning with the first instructional day) into the current calendar year and the student does not have an active Eligibility record on the extract Effective Date.
  - Where no *Carry-Over* is present, reports for a student who has an Eligibility record in the current calendar year and the extract Effective Date is on or before 30 business days into the current year, the Eligibility Status of the current year takes precedence over any previous years' records.
  - A note on Carry-Over logic: when the student's current year enrollment has an End Date that is on or before the first 30 instructional days of the school year, the carry-over status applies even when the extract Effective Date is after the 30 day carry-over period.

Reports as **0** if any of the above are not true.

## Reduced Lunch Logic

Reports from the School History record with the most recent Effective Date that is on or before the extract Effective Date (when Calendar Start Year is on or after the Provision Base Year and Calendar End Year is on or before the Provision End Year on the School History record).

This field reports as **1** in the following instances:

- When the student has an Eligibility record of Reduced with a Start Date on or before the extract Effective Date and an End Date on or after the extract Effective Date.
- Where a *30-Day Carry-Over* is present, reports for a student who had an Eligibility of Reduced on the last day of their enrollment in the previous year calendar and the extract Effective Date is on or before 30 business days (beginning with the first instructional day) into the current calendar year and the student does not have an active Eligibility record on the extract Effective Date.
  - Where no *Carry-Over* is present, reports for a student who has an Eligibility record in the current calendar year and the extract Effective Date is on or before 30 business days into the current year, the Eligibility Status of the current year takes precedence over any previous years' records.
  - A note on Carry-Over logic: when the student's current year enrollment has an End Date that is on or before the first 30 instructional days of the school year, the carry-over status applies even when the extract Effective Date is after the 30 day carry-over period.

Reports as **0** if any of the above are not true.

## Days Present Logic

The following describes the logic used to determine reported Days Present values:

- Days Present = Days Enrolled = Absent Days
- When Scheduling & Courses > Calendar Setup > Grade Level Setup > Grade Level Detail > Standard Day) = "50" in any grade level in the calendar, Days Present logic reports based on

the logic above.

Absent Days = Sum of all the absence days (Status = A; Excuse = NOT X) in instructional periods that fall within the enrollment start and end date range that are also  $\leq$  extract Effective Date.

Present Minutes = Student Information > General > Attendance > Attendance Info > Present Minutes

Whole Day Absence = Scheduling & Courses > Calendar Setup > Calendar Information > Whole Day Absence, When Whole Day = Null, Whole Day = 240.

Half Day Absence = Scheduling & Courses > Calendar Setup > Calendar Information > Half Day Absence, When Half Day = Null, Half Day = 120.

If time absent  $\geq$  Whole Day, then student is considered Absent for the day. If time absent  $\geq$  Half Day, then student is considered Absent for 0.5 day.

Lunch period is subtracted from total minutes.

- When (Scheduling & Courses > Calendar Setup > Calendar Information > Grade Levels > Grade Level Detail > Standard Day) NOT= "50" in any grade level in the calendar:
  - From across all periods with "Instruction" = Checked in instructional days up to and including the extract Effective Date:
    1. Find the total hours available in each instructional period, rounded to the nearest hundredth (.01).
    2. For each period in which the student was marked Absent, Not Exempt:
      1. Subtract the hours (rounded to the hundredth) for the period from the student's total daily attendance.
      2. Lunch minutes are subtracted from the total hours calculation for the applicable period.
    3. Days Present = Sum the total instructional hours in the day (rounded to the hundredth) MINUS student's absent hours based on period attendance (rounded to the hundredth). Report to the hundredths of a day in format 0.00 to xxx.00
  - Whole Day Absent override:
    1. When (Scheduling & Courses > Calendar Setup > Calendar Information > Whole Day Absence (minutes)) NOT = Null:
      1. When the student's calculated absent minutes in the day  $\geq$  Whole Day Absence (minutes), count the student's day as fully absent (0.0).
    2. When (Scheduling & Courses > Calendar Setup > Calendar Information > Whole Day Absence) = Null, ignore this override field.
  - Half Day Absent override:
    1. When (Scheduling & Courses > Calendar Setup > Calendar Information > Half Day Absence (minutes)) NOT = Null:
      1. When the student's calculated absent minutes in the day  $\geq$  Half Day Absence (minutes) AND  $<$  Whole Day Absence (minutes), count the student's day as half absent (0.5).
    2. When (Scheduling & Courses > Calendar Setup > Calendar Information > Half Day Absence) = Null, ignore this override field.
  - Format: 0.00 to xxx.00
