Tool Search: Test Setup

The [Assessment Center](#) (released in Campus.2223) provides users with the ability to create and manage assessments administered to students for district, state, and national tests. The Test Setup functionality described below will be deprecated in a future release.

To accurately collect data for the [Assessment Fact Template](#), specific test setup is required. Use the information provided in this article to set up State and National tests.

This article also includes information about the fields on the [Assessment Fact Template](#) that report based on the Assessment Test Setup.

See the core [Test Setup](#) articles for additional information on managing tests.

The screenshot shows the 'Test Setup' interface. At the top, there are navigation links: 'Student > Assessment Administration > Test Setup'. Below this are three buttons: 'Save', 'Delete', and 'New Test'. A list of tests is displayed, organized by year from 2019 down to 2011, with the number of tests in parentheses next to each year. Below the list is the 'Test Detail' form, which includes fields for:
 

- \*Name (text input)
- Parent Test (dropdown menu, currently set to '(no parent)')
- Code (text input) and Year (dropdown menu)
- Subject (dropdown menu)
- Test Grade Level (dropdown menu)
- Assessment Type (dropdown menu)

 A red arrow points from a text box to the Subject dropdown menu. The text box contains the following instructions:
 

Populate the **Subject** dropdown list for all District Tests and National Tests that are not state reported by going to System Administration > Attribute Dictionary > Test > Subject (test.type).
