The 060 Staff Member extract reports demographic information about staff members to EIS.

The 060 extract is considered a parent record in EIS, meaning that it must be uploaded prior to any other staff member records. Typically, districts upload 060 Staff Member records to EIS as a single submission two weeks after school has started. 060 records are uploaded weekly thereafter.

See the [EIS Batch Transmission](#) article for an overview of the EIS Batch Transmission File, logic that applies to all extracts, and generation instructions.

## Report Logic

This extract reports records for staff members associated with the Primary School and staff members assigned to any sections that have students scheduled at a Service School. The Primary school is the school tied to the calendar selected in the Batch Transmission Editor.

- A record reports for each non-excluded staff member at the Primary school.
- A record reports for each non-excluded staff member who teaches a student with a Primary enrollment and a subsequent Partial enrollment in another school (considered a Service School). The staff member must have a Role of Primary Teacher or Co-Teacher in the Service School section to report; Section Staff do not report.
- Teachers tied to Service School students with future-dated enrollments report records on or after the corresponding Effective Date selected in the extract editor. Records do not report in advance.

The staff member must have a District Employment record to report. If multiple District Employments exist for a staff member, the one with the most recent Start Date reports.

Records report for future-dated records. District Assignments must:

- Be active at least one day during the current school year for any calendar tied to the school,
- Have Teacher marked, and
- Have an Assignment Code entered.

Staff members can be linked to a calendar through a Section Staff History record. Staff with District Assignments marked as Teacher who do not have Staff History records tied to a course report a record for each calendar tied to the school.

## Exclude Logic

The following records are not included in the 060 extract:

- Staff
  - Staff History records associated with Courses that have no State Code or that are marked Exclude or are in Calendars marked Exclude. (Only applies to Service School teachers.)
  - No Social Security Number or an Assignment Code.
  - Not marked as a Teacher on their District Assignment.
  - No email address entered on the Demographics tab.
- Student (Only applies to Service School teachers.)
  - No Student State ID.
  - Multiple enrollments with a Service Type of P, multiple enrollments of any type in the same school, or any enrollment with a Service Type of N.
  - Enrollment marked as No Show or State Exclude, or enrolled in a calendar or grade level marked as exclude.
- Course/Section (Only applies to Service School teachers.)
  - Not uploaded to EIS via the [EIS 030 Class Section extract](#).

Excluded records are included in the warning report.

If a record was previously reported and then marked as exclude, a delete record will be sent to EIS for each record.

The **Record Key**, which helps determine the Type of record sent (New, Edit, or Delete), is comprised of the Record ID, Record Version, District ID, School ID, School Year, Instructional Program Number, Staff Social Security Number, Teacher License Number, and Staff Work Email Address.

## Recommended District Setup

Campus does not support reporting students who have Service School enrollments across districts. For students attending Service School classes in another district, complete data entry for scheduling, attendance, and grades in both the Primary and Service schools.
