[Best Practices and Things to Know](#) | [Suggested Academic Planning Tool Rights](#) | [Academic Planning Workflow](#) | [Use Basic Academic Planning Functionality](#)

Tool Search: Academic Planning

Academic Planning allows schools to create an academic plan encompassing a student's entire high school career. This includes 8th-grade students moving into 9th grade all the way through their senior year.

Academic Planning is a process that requires the use of several tools in Campus and several roles in a school.

Best Practices and Things to Know

It is not required to use Academic Planning functionality, but if you do, there are certain things to consider.

- The articles linked in the Tools column below contain a Best Practices section for these considerations.
- Academic Planning considers all enrollment types.
- Only one credit group is allowed per academic program.
- The Credit Summary report can only be generated from the student's [Credit Summary](#) tab. However, this information can be viewed on the student's Transcript, by building an Ad Hoc filter or generating other Grading and Standards Reports.
- [Course Catalogs](#) used in different schools (for example, middle school and high school) should have unique course numbers.
- The [Course Plan](#) tool is used by counselors to populate the student's academic plan. Students can see this academic plan on their [Academic Planner](#) in the Portal. In turn, counselors can see the student's changes on the Academic Planner by viewing the Course Plan tool.
- If a student is scheduled (has a roster entry) into a course, grades for that course must be posted to the transcript using the [Transcript Post](#) tool. Grades may not be manually entered.

Suggested Academic Planning Tool Rights

▶ [Click here to expand...](#)

The following tool rights are suggested tool rights for each type of user (role) when incorporating Academic Planning into your school's process. Additional tool rights may be given to allow a specific user or user group to successfully perform the tasks of their job.

For more information on tool rights, see the [Tool Rights](#) article.

Description of Tool Rights

Tool Rights determine the level of access users have to tools throughout Campus. This article refers to tool rights in abbreviated form (i.e., R, W, A, D or any combination of the four). In general, user rights are cumulative; therefore, a user who has A rights always has RW rights, unless otherwise noted. Sub-rights appear as *italicized*.

Right	Description
R (Read)	The R right indicates the information on the corresponding tool may be viewed by the user. When applicable, the user is also allowed to print information. The user will NOT have access to the Save, Add or Delete icons in the action bar.
W (Write)	The W right indicates the user may view and modify the information on the corresponding tool. The Save icon in the action bar will be functional. This right allows the user to modify only existing data in the area since adding new data is controlled by the A right. This right includes the ability to change or remove data from a specific field. A user always has R rights if they have W rights.
A (Add)	The A right indicates the user may view, modify and add to the information on the corresponding tool. The New and Add icons in the action bar will be functional. This right allows the user to add new data/records. A user will generally have RW rights if they have A rights. Details and exceptions are noted in this article.
D (Delete)	ASSIGN THIS RIGHT WITH CAUTION. The D right indicates the information on the corresponding tool may be deleted. The Delete icon in the action bar will be functional. This right provides the ability to completely remove an existing record, including all data contained within the record. The ability to change/remove data from a field is controlled through the W right. A user will generally have RWA rights if they have D rights. Details and exceptions are noted in this article.

RWAD Rights assigned at the module or folder level give those rights to all features within the module. For example, giving RW rights to the System Administration Calendar folder assigns RW rights to all tools within that folder, including any subrights.

Academic Planning Workflow

▶ [Click here to expand...](#)

Before beginning this process, gather the necessary documents for:

- State Graduation Requirements
- District Graduation Requirements
- Course Requirements
- Course Prerequisites
- School Course Catalog
- Student Handbook

Also, verify and/or assign [tool rights](#) for appropriate staff.

Use Basic Academic Planning Functionality

Using all available Academic Planning tools requires time to set up the information in Campus. Because of the time requirement, some districts may not want to wait to implement this process. The procedures below provide information on using the basic functionality of academic planning.

▶ [Click here to expand...](#)

Create and Assign a Basic Academic Plan

If your school has not set up academic programs and you need to use Credit Summary with the option of Completed/Required, follow these steps. See the [Create Graduation Programs](#) or the [Create Academic Programs](#) for complete instructions.

Step 1. Create New Program

- Navigate to the [Programs](#) tool.
- Select the **New Program** icon. A **Program Detail** editor will appear to the right.
- Enter the **Name** of the Graduation or Academic Program.
- Select the **Credit Group** assigned to High School for graduation
- Click the Save icon.

Step 2. Enter Credit Requirements

After saving the new program, expand it and choose [Credit Requirements](#).

1. In grade 12, enter minimum amount of credits required to receive a diploma.
2. Enter a **Sequence** value. Only credit types with an assigned credit requirement will display in alphabetical order on Grad Progress unless a sequence is entered.
3. Click the **Save** icon.

Step 3. Assign students to the new program

1. Navigate to the [Batch Assignment Tool](#).
2. Select the **Program** (ex., HS Graduation) to add to the student's information.
3. Enter a **Start Date**.
4. Select the grade to assign the program.
5. Click the **Update Flag/Academic Program** button.

Step 4. Calculate Student Status

1. Navigate to the [Course Plan Admin](#) tool.
2. Select Calculate on-track status mode.
3. Click the **Submit to Batch** button.

View Student Graduation Progress when assigned a Basic Academic Plan

A student must be assigned an Academic Program to see remaining credits toward graduation.

1. Navigate to Student Information and search for and select the desired student.
2. Expand the Academic Planning option and select the [Progress](#) tab.

Report Student Graduation Progress when assigned a Basic Academic Plan

1. Navigate to the [Academic Plan Status Report](#).
2. Select the Student Filters:
 1. Select the **Academic Program** assigned to students
 2. Select the grade level (optional).
 3. Select a Status (All students, On-track only, Off-track only).
3. Click the **Generate Report** button.
