

# ISBE Extracts: ISBE 504 Extract

Last Modified on 06/04/2024 2:45 pm CDT

[Report Logic](#) | [Report Editor](#) | [Generate the Report](#) | [504 Extract Layout](#)

## Tool Search: ISBE Extracts

The Section 504 Extract reports students who have an active primary enrollment in the selected calendar as of the report date where an active Section 504 record exists (Student Information > Program Participation > Section 504). One record reports for each calendar of enrollment.

*ISBE Section 504 Extract*

## Report Logic

One record reports for each student who has a Primary Enrollment in the selected calendar AND meets one of the following:

- The student has a 504 record with an end date on or after the Effective Date entered on the report editor, OR
- The student has a 504 record that does not have an end date and the start date of the 504 record is on or after the student's enrollment start date.

One record reports for each calendar of enrollment. When the student has multiple enrollments, each with unique RCDTS Serving Schools and Home Schools, one record reports. For students whose 504 has a future end date, the extract reports the current 504 record with a blank end date.

A record reports even when the student is no longer enrolled as of the entered Effective Date. This captures students who may have had an active 504 record prior to the Effective Date in the selected calendar and includes those students who were enrolled, ended enrollment (withdrew) and re-enrolled in the same calendar.

## Report Editor

Field	Description
<b>Extract Type</b>	Selection determines the extract that is generated. For this instance, select the <b>504</b> option.
<b>Effective Date</b>	Entered date is used to return current enrollments for the report. This field automatically populates with the current date, but can be changed by entering a new date in <i>mm/dd/yyyy</i> format or by clicking the calendar icon to select a date. This date is required in order to generate the report. <ul style="list-style-type: none"> <li>• If an enrollment record has an end date before the effective date, that record is not included</li> <li>• If an enrollment record has an end date after the effective date or does not have an end date, that record is included.</li> </ul>
<b>File Identifier</b>	Indicates the number attached to the end of the file name and is used to differentiate the file from other files generated.
<b>Format</b>	Determines how the report generates. Use the <b>State Format (Comma Delimited)</b> when submitting the report to the state. Use the <b>HTML</b> or <b>Tab Delimited</b> option when reviewing data prior to state submission.
<b>Ad hoc</b>	Select a saved ad hoc filter to use when generating this report. Only those students included in the filter are returned on the report if they meet the reporting requirements.
<b>Calendar Selection</b>	At least one calendar needs to be selected for the report to generate. Calendars can be chosen by <b>Active Year</b> , by <b>School</b> or by <b>Year</b> . If a calendar is selected in the Campus toolbar, that calendar is automatically selected.
<b>Report Generation</b>	The report can be generated immediately using the <b>Generate Extract</b> button. When there is a larger amount of data chosen (several calendars, large date range, etc.), use the <b>Submit to Batch</b> button, which allows the user to choose when the report is generated. See the <a href="#">Batch Queue</a> article for more information.

## Generate the Report

1. Select **504** from the **Extract Type** field.
2. Enter the **Effective Date** for the report.

3. Enter a **File Identifier**. This is a three digit number attached to the file name used to differentiate itself from other ISBE Demographic and Enrollment Extract files generated.
4. Select which **Format** to generate the report in. To preview information prior to submission to the state, use the HTML format. When submitting data to the state, use the State Format (Comma Delimited).
5. If desired, select an **Ad hoc Filter** from which to pull the student set.
6. Select which **Calendars** to include within the report.
7. Select the **Generate Extract** button or use the **Submit to Batch** option. The report displays in a separate window in the designated format.
