Tool Search: Upload Wizard

Districts that do not use the Infinite Campus District Edition to manage their district data can use the State Edition Upload tool to upload files containing their district's student information to the State System. Files uploaded with the tool must conform to the File Specifications noted in the following information.

Special Education records from prior school years can be included in the upload.

The screenshot shows the 'Upload Wizard' interface. At the top, there's a breadcrumb trail: 'Reporting > SD State Reporting > Upload Wizard'. Below this is a blue header bar with 'Upload Wizard' and a star icon. The main content area has a white box with instructions: 'Select the file you wish to upload to the Campus server and the type of load you want to perform'. It lists three options: 1. **Validate and Test File** - Only error checking will be performed on the file. A summary report will be generated identifying any errors that were found. No data is imported under this option. 2. **Load Partial File** - Data from the file will **add to or update the current student record**. A summary report will be generated indicating the number of records that were inserted or changed and any errors. This option should be used when updating the information on a partial list of students. 3. **Load Complete File** - **CAUTION** Data imported from this file **will replace all existing data** from the calendars included in the file. A summary report will be generated indicating the number of records that were changed or deleted. This option is useful for deleting any data that was previously entered and replacing it with the contents of the uploaded file. Below the instructions, there's a 'Work to Perform' dropdown menu set to 'Validate and Test File'. Under 'File', there's a 'Browse...' button, 'No file selected.', and an 'Upload' button. Below that is a 'Submit to Batch' button. Under 'Result File', there's a dropdown menu and a 'Load' button.

Upload Wizard tool

The user account must be set to the district that they are trying to upload into or must have state-wide district rights.

Prior to uploading a file, a calendar for the current year and all required grade levels for that calendar must be set up within the SD State Edition user interface. If this is not done, an error message will be displayed when an attempt is made to upload.

Additionally, the upload tool assumes that a School/Year has only one calendar and one schedule structure defined within the State Edition. If multiple calendars or schedule structures are created for that school/year, an error displays when an upload is attempted.

Upload Wizard Actions

The Upload Wizard provides three actions that can be selected:

Action	Description
Validate and Test	In this mode the file is uploaded and all data validation will be performed to ensure that the file conforms to the file specifications section. Additionally, a search will be performed on the District, School and Student Number to make sure the named District, School and Students actually exist. No data will change as a result of this action. A report will be generated listing errors and their corresponding line numbers and fields of error.
Load Partial	<p>This mode will insert or update data for each record from the file that has no errors. If a row has an error, it will be displayed in the report generated after the upload completes.</p> <p>When inserting new data, such as at the beginning of a school year, each student record in the file will create a new enrollment record.</p> <p>When updating data that already exists, the enrollment start date will be used to match the enrollment that should be updated. If an enrollment with a matching start date is not found, a new enrollment will be created.</p> <p>When updating the dated enrollment fields Meal Status and Title 1, the dated record that will be changed is the one with an effective date matching the enrollment start date. If none can be found, a new record with that date is created.</p> <p>When updating the dated fields - SPED, Special Ed Program, Special Ed Category, and Disability - the dated field is matched to the existing SPED data within the Special Ed Summary based on the Special Ed Effective Date field. If a record with that effective date cannot be found, a new record is created with that Special Ed effective date.</p>
Load Complete	<p>In addition to Validating and Testing, the Load Complete mode will erase all student data from calendars named in the upload file. After that, the records in the file are inserted as new enrollments. This mode should be used if a complete refresh of the data is required. It should not be used if any data has been manually edited through the user interface as that data will be lost.</p> <p>This removes all existing data.</p>

Upload Files

1. Select the appropriate action as defined above in the **Work to Perform** dropdown list.
2. Locate the file to upload by selecting the **Browse** button in the File field. Follow the instructions for uploading and click the **Upload** button.
3. Or, select a file from the **Result File** dropdown and click the **Load** button.

The file processes and a verification of the upload is returned.

Error Count:1

Warning Count:0

Error Detail:

Line Number	Error Message	Content
1	Bad header data length in field 'Record Type', column 1. Field can be at most 2 characters and must be at least 2 characters.	HD 12/01/2006 23:00:00 SD2.0

Warning Detail:

Line Number	Warning Message	Content

Upload Confirmation

Not all fields are automatically overwritten at the state level. When **First Year in Country, Parent Does not want Meal Status shared with DSS , Meal Status** or any type of Title 1 fields are not null at the state level but no or null at the district level, a message will appear when a status change is attempted indicating that a status that is not No or Null exists and should not be overwritten.

The Enrollment Upload will create split fields with the date of the Enrollment Report Upload for Meal Status (if the status is changed from F or R to Standard) and any Title 1 status (if changed from Yes to No), with a warning message indicating that the student record was successfully imported and a new record was created.

File Specifications

Files should follow the proper naming conventions and record definitions defined below:

- All files will be tab delimited with a header record.
- If a field is not required it can be left blank, but the proper number of tabs must be in each record.
- All dates within the file will be in the format MM/DD/YYYY.
- Times within the file will be displayed in military (24 hour) time HH:MM:SS such as 23:00:00 for 11:00pm.

File Name

Files must be named with the district number (maximum of 5 digits), underscore, date underscore, and record type with the extension *.tsv. Forward slashes are not allowed in file names and should be left out.

Example:

District 10063 submitting a Student Demographics file on 12/01/2006 would name the file: 10063_12012006_SD.tsv

Header Record

The first line of all files will be the header record. This is required.

Name	Length	Code/Format	Description
Record Type	2	"HD"	Always the value "HD"
Date	01	MM/DD/YYYY	Date report was generated
Time	8	HH:MM:SS	Time report was generated
Version	15	"SD2.0"	Always the value "SD2.0"

Example Record:

Header record submitted on December 1, 2006 at 11:00 pm:

School Calendar Upload Specifications

This record defines each School Calendar or track a school is running. There should be at least 1 record per school. There can be multiple records per school if the school has students receiving instruction on different days or for different durations. If the school has multiple calendars, each calendar must be given a distinct Calendar Number.

Element Name	Description	Location
Record Type	Type of record being generated. Always the value of "SS". <i>Alphabetic, 2 characters</i>	Data not stored
District Number	State-assigned district identification number. <i>Numeric, 5 digits</i>	District Information > District Number District.number
School Number	State-assigned school identification number. <i>Numeric, 2 digits</i>	School Information > State School Number School.number

Year	<p>The end year of the calendar.</p> <p><i>Date field, 4 characters (YYYY)</i></p>	<p>School Year Setup > End Year</p> <p>Calendar.endYear</p>
Calendar Number	<p>Number assigned to the calendar. Needs to match calendar number in associated SD-Extract-School Calendar file.</p> <p><i>Numeric, 3 digits</i></p>	<p>Calendar Information > Calendar ID</p> <p>Calendar.number</p>
Calendar Type	<p>The type of calendar for which information is being reported. If the value being imported is not a valid option, a warning will appear. If data already exists but the import file does not have a value entered, the existing value will not be overwritten.</p> <p><i>Alphanumeric, 1 character</i></p>	<p>Calendar Information > Type</p> <p>Calendar.type</p>
Student Day	<p>The number of minutes of instruction in the typical student day.</p> <p><i>Numeric, 3 digits</i></p>	<p>Calendar Information > Calendar</p> <p>Calendar.studentDay</p>
4 Day School Week	<p>Indicates a 4 Day School Week.</p> <p><i>Alphanumeric, 1 character (Y or N)</i></p>	<p>Calendar Information > 4 Day School Week</p> <p>Calendar.alternativeCode</p>
Virtual	<p>If this field = Y, check the Virtual box on the import calendar. If blank or N, do not check the box. If currently checked and field is blank or N, do not uncheck box.</p> <p><i>Alphanumeric, 1 character (Y or N)</i></p>	<p>Calendar Information > Virtual</p> <p>Calendar.virtual</p>

Example Records:

An elementary school (0120) grades 1 through 6 that attend 360 minutes of instruction per day and has half-day Kindergarten that attends 180 minutes of instruction per day and starts on a different date than the other grades.

SS 63 2007 1 360 Y

SS 63 120 2007 2 180 Y

School Days Upload Specifications

This record defines when a school is open and when it provides instruction to students. There should be 1 record per date per School Calendar record within the date range that the school is open.

Element Name	Description	Location
Record Type	Type of record being generated. In this case, always a value of "DY". <i>Alphabetic, 2 characters</i>	Not dynamically stored
District Number	State-assigned district identification number. <i>Numeric, 5 digits</i>	District Information > District Number District.number
School Number	State assigned school identification number. <i>Numeric, 2 digits</i>	District Information > State School Number School.number
Year	The end year of the calendar (<i>i.e.</i> for 2006-2007 = 2007). <i>Date field, 4 characters (YYYY)</i>	School Year Setup > End Year Calendar.endYear
Calendar Number	Number assigned to the calendar. Needs to match calendar number in associated SD-Extract-School Calendar file. <i>Numeric, 3 digits</i>	Calendar Information > Number Calendar.number
Date	A day record for each day in the calendar <i>Date field, 10 characters (MM/DD/YYYY)</i>	Day Setup > Date Day.date
Instructional Day	Indicates whether instruction was given to students on this date. <i>Alphabetic, 2 characters (Y or N)</i>	Calendar Information > Days > Instruction Day.instruction
School Day	Indicates if the school was open on this date (<i>i.e.</i> teacher in-service day will have Instruction = N and School Day = Y). <i>Alphabetic, 2 characters (Y or N)</i>	Day Setup > School Day Day.schoolDay

Attendance Day	Indicates if there is attendance for this day. <i>Alphabetic, 2 characters (Y or N)</i>	Day Setup > Attendance Day.attendance
Day Duration	Number of minutes of instruction offered on this day. <i>Numeric, 3 digits</i>	Day Setup > Duration Day.duration

Example Records:

The week of April 22, 2007 to April 28, 2007 has instruction starting Monday and continuing through Thursday, with a teacher in-service day on Friday; its records would look like:

DY 63 2007 1 04/22/2007 N N N 0

DY 63 120 2007 1 04/28/2007 N N N 0

Student Demographic Upload Specifications

This record format contains basic student demographics fields. Typically there should be one record per student. The exception for this is when a student's name or identifying information changes while at a district. The state needs to maintain a history of all name changes for students, and the effective date controls when this name was used.

When a new identity is created for a person, existing information in the Person Information area of the Demographics tab is not deleted for the following fields:

- Social Security Number
- Birth Country
- Date Entered US
- Date Entered US School
- Date Entered State School
- Birth Verification
- Nickname
- Comments

Element Name	Description	Location
Record Type	The type of record being generated. In this case, always the value of "SD" for student demographics. <i>Alphabetic, 2 characters</i>	Not dynamically stored
District Number	State-assigned district identification number. <i>Numeric, 5 digits</i>	District Information > District Number District.number
State ID	State identification number assigned to students. When importing in the State Edition, if the State ID does not match any person, a new person is created and a new State ID is created. The State ID in the file is not imported. When importing in the District Edition, if the State ID is null, the record is ignored and not imported. If the State ID exists in the file but does not match a person, an error message is produced and the record is not imported. <i>Numeric, 9 digits</i>	Demographics > Person Identifiers > Student State ID Person. studentNumber

Example Records:

A student record for Joe Smith,

SD 63 Smith Joe Alan II M 03/01/1997 05

Common errors:

- Gender or Race/Ethnicity left blank (data is required for these fields)
- Field names included in file (please remove all field names, such as legal entity number, gender, race/ethnicity, etc.).
- Date Fields must be in a MM/DD/YYYY format (e.g. 03/07/1999).
- Fields with no information still require a tab.

Enrollment Upload Specifications

This record contains information for the student enrollment. Typically there should be one record per student enrollment. For your file name, the record type is EN.

The Enrollment Import file will not overwrite existing Homeless records.
