Tool Search: Upload Wizard

Districts that do not use the Infinite Campus District Edition to manage their district data can use the State Edition Upload tool to upload files containing their district's student information to the State System. Files uploaded with the tool must conform to the File Specifications noted in the following information.

Upload Wizard tool

To use the tool, users must have tool rights to the Upload Wizard tool. Their user account must be set to the district that they are trying to upload into or must have state-wide district rights.

Prior to uploading a file, a calendar for the current year and all required grade levels for that calendar must be setup within the SD State Edition user interface. If this is not done, an error message will be displayed when an upload is attempted.

Additionally, the upload tool assumes that a School/Year has only one calendar and one schedule structure defined within the State Edition. If multiple calendars or schedule structures are created for that school/year, an error will display when an upload is attempted.

Understanding the Upload Wizard

The Upload Wizard provides three actions that can be selected:

Action	Description
Validate and Test	In this mode the file will be uploaded and all data validation will be performed to ensure that the file conforms to the file specifications section. Additionally, a search will be performed on the District, School and Student Number to make sure the named District, School and Students actually exist. No data will change as a result of this action. A report will be generated listing errors and their corresponding line numbers and fields of error.
Load Partial	This mode will insert or update data for each record from the file that has no errors. If a row has an error, it will be displayed in the report generated after the upload completes. When inserting new data, such as at the beginning of a school year, each student record in the file will create a new enrollment record. When updating data that already exists, the enrollment start date will be used to match the enrollment that should be updated. If an enrollment with a matching start date is not found, a new enrollment will be created. When updating the dated enrollment fields Meal Status and Title 1, the dated record that will be changed is the one with an effective date matching the enrollment start date. If none can be found, a new record with that date is created. When updating the dated fields, SPED, Special Ed Program, Special Ed Category and Disability, the dated field will be matched to existing SPED data within the enrollment based on the Special Ed Start Date field. If a SPED record with that start date cannot be found, a new record is created with that Special Ed start date.
Load Complete	In addition to Validating and Testing, the Load Complete mode will erase all student data from calendars named in the upload file. After that, the records in the file are inserted as new enrollments. This mode should be used if a complete refresh of the data is required. It should not be used if any data has been manually edited through the user interface as that data will be lost. This removes all existing data.

Uploading Files

1. Select the appropriate action as defined above in the **Work to Perform** dropdown list.
2. Locate the file to upload by selecting the **Browse** button in the File field. Follow the instructions for uploading and click the **Upload** button.
3. Or, select a file from the **Result File** dropdown and click the **Load** button.

The file processes and a verification of the upload is returned.

Upload Confirmation

Not all fields are automatically overwritten at the state level. When **First Year in Country**, **Parent Does not want Meal Status shared with DSS** , **Meal Status** or any type of Title 1 fields are not null at the state level but no or null at the district level, a message will appear when a status change is attempted indicating that a status that is not No or Null exists and should not be overwritten.

The Enrollment Upload will create split fields with the date of the Enrollment Report Upload for Meal Status (if the status is changed from F or R to Standard) and any Title 1 status (if changed from Yes to No), with a warning message indicating that the student record was successfully imported and a new record was created.

File Specifications

Files should follow the proper naming conventions and record definitions defined below:

- All files will be tab delimited with a header record.
- If a field is not required it can be left blank, but the proper number of tabs must be in each record.
- All dates within the file will be in the format MM/DD/YYYY.
- Times within the file will be displayed in military (24 hour) time HH:MM:SS such as 23:00:00 for 11:00pm.

File Name

Files must be named with the district number (maximum of 5 digits), underscore, date underscore

and record type with the extension *.tsv. Forward slashes are not allowed in file names and should be left out.

Example:

District 10063 submitting a Student Demographics file on 12/01/2006 would name the file:
10063_12012006_SD.tsv

Student Demographic Upload Specifications

This record format contains basic student demographics fields. Typically there should be one record per student. The exception for this is when a student's name or identifying information changes while at a district. The state needs to maintain a history of all name changes for students, and the effective date controls when this name was used.

When a new identity is created for a person, existing information in the Person Information area of the Demographics tab is not deleted for the following fields:

- Social Security Number
- Birth Country

- Date Entered US School
- Date Entered State School
