

Special Education (Maryland)

Last Modified on 03/11/2024 8:45 am CDT

Maryland special education users should create plans for their students who have IEPs so that data can be reported in state reports.

[Plan Types](#) are created in System Administration > Special Ed. Plans should have a print format of **MD Sped Data Summary**. This print format includes the basic special education information needed in state reports.

The screenshot displays the configuration interface for Special Education Plan Types. At the top, there are 'Save', 'New', and 'Delete' buttons. Below is a table for 'PlanType/PlanTypeEditor List' with columns for 'Abbreviation' and 'Name'. The main section is 'PlanType Detail', which includes a dropdown for '*Print Format' (highlighted with a red box and set to 'MD Sped Data Summary'), a field for '*Abbreviation *Name', an 'Active' checkbox, and text areas for 'Comments' and 'User Instruction Text'. At the bottom is a 'PlanTypeEditor Detail' table.

Seq	Active	Name	Comments
10	<input checked="" type="checkbox"/>	Sped Data Summary	MD 2016 Sped state reporting data

Image 1: Special Ed Plan Type

Special ed personnel add plans to students on the [Documents](#). The name of the document may vary based on district setup.

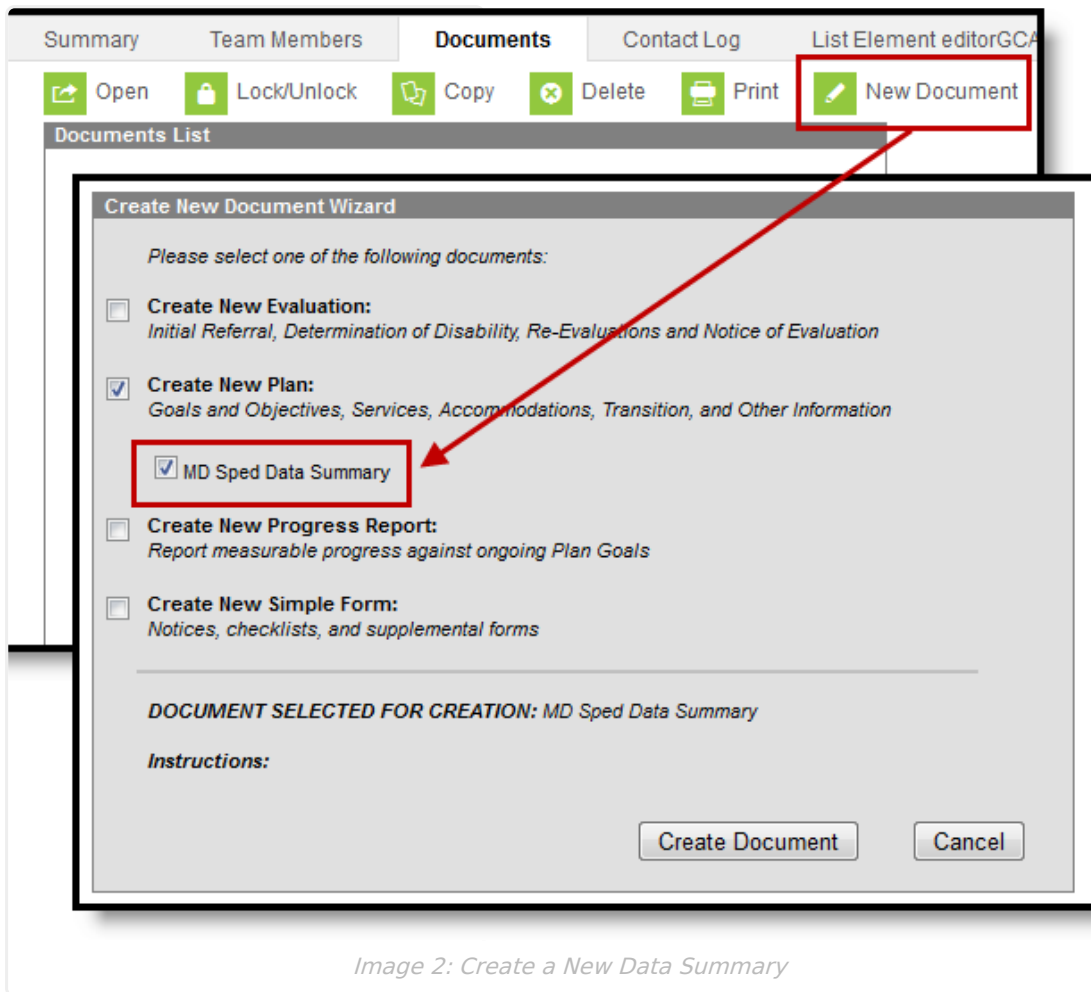

Image 2: Create a New Data Summary

To report data from this plan, use Ad hoc Reporting > Filter Designer > Student > Learner Planning > Sped Summary.
