Tool Search: Student Locator

The Student Locator Wizard provides a way to search for existing students across the district, and when necessary, create new students. This tool can also be used to locate and update information for a specific student.

The Student Locator searches ALL people in order to prevent duplicates.

Last Name	Student	Name	State ID	Gender	Birth Date	%
First Name	Jackie	Student, Jackie Jo	123456789	F	10/13/2002	67
Gender	Female					
Birth Date	10/13/2002					
Middle Name						
SSN #						
State ID						

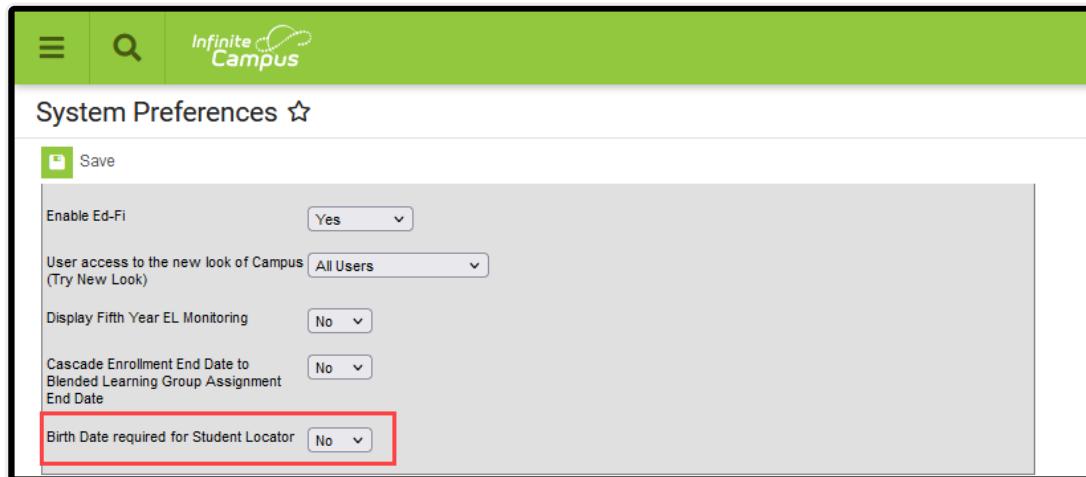

Student Locator

See the [Student Locator Tool Rights](#) article for information about rights needed to use this tool.

Student Locator System Preference

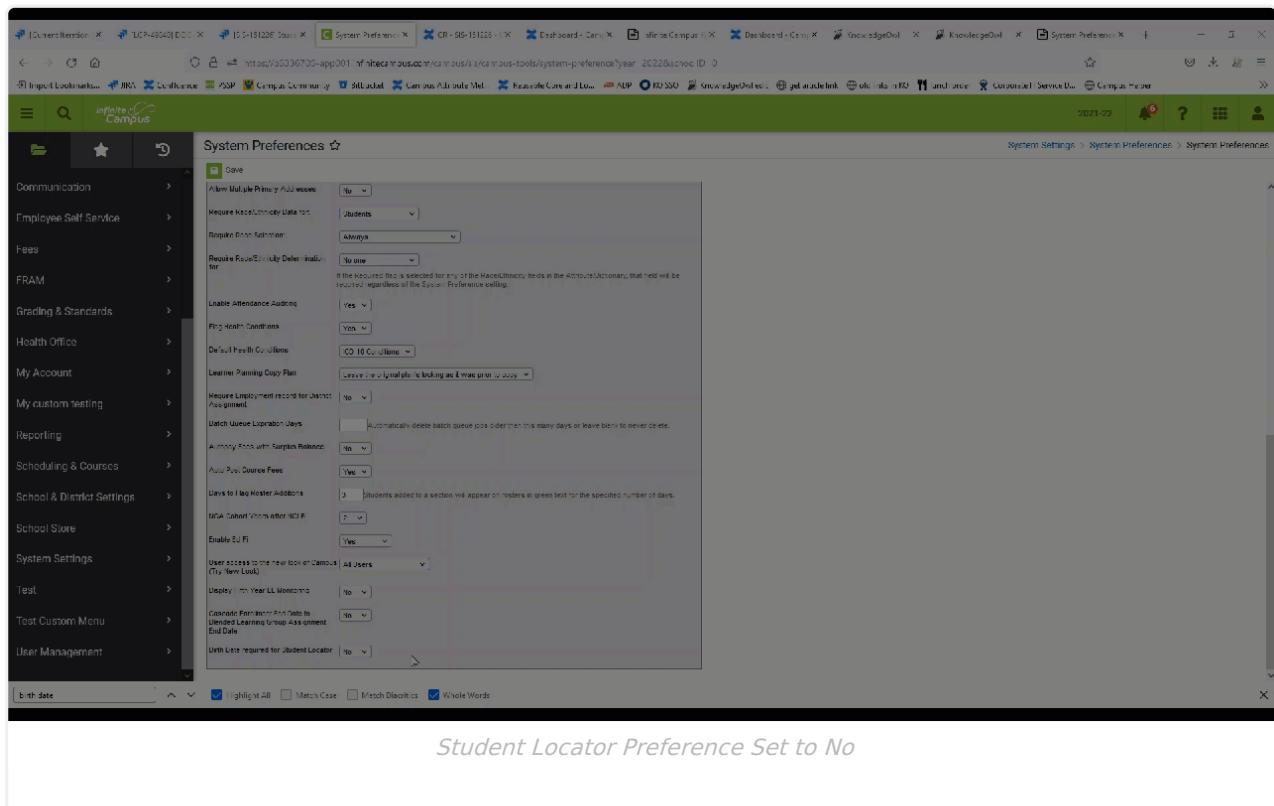

The **Birth Date Required for Student Locator** [System Preference](#), called **Birth Date Required**

for **Student Locator**, determines whether the Birth Date field is required before searching for and locating students.

Student Locator Birth Date Preference

When set to **No**, the Search field is available on the Student Locator when the Last Name, First Name, and Gender fields are populated, OR when the State ID field is populated.

Student Locator Preference Set to No

When set to **Yes**, the Search field is available on the Student Locator when the Last Name, First Name, Gender AND Birth Date fields are populated, OR when the State ID field is populated. **For Kentucky districts, this preference is always set to Yes.**

Locate a Student

Searching for a student indicates whether or not the student (or person) already exists in Campus, and when that student does not exist in Campus, a new student can be created. This avoids duplicate student records within Campus and provides a simple way to convert an existing person into a student.

1. Enter search criteria for locating a student. Depending on the selected System Preference settings, a **Last Name**, **First Name**, and **Gender**, or **State ID** (preference set to No), or a **Last Name**, **First Name**, **Gender**, and **Birth Date**, or **State ID** (preference set to Yes) must be entered in order to activate the Search button. Additional search criteria can also be entered. Hover over the results to see enrollment information for the student. The hover shows the dates of the student's most recent enrollment, the school and grade level of that enrollment, and the student's guardians. When a student's most current enrollment is marked as No Show, the hover displays the student's previous district's enrollment.

BIE users can search for students based on NASIS ID. For security reasons, this tool only uses the last 4 digits of a student's Social Security number (SSN).

2. Click the **Search** button. Matching results display. On state-linked district editions, both the state and district databases are queried to find matching results. When the state database cannot be reached, a warning message displays indicating only the district database is being queried.

Select a Student from the Search Results

1. Select a student from the search results. The screen changes to the Student Information toolset. The arrow next to the student's name indicates the student is locally enrolled
2. Navigate to the appropriate student tool to verify student information.

See below to view detailed information about how the Percent (%) is calculated.

► [Click here to expand...](#)

The percentage listed indicates how closely an existing student matches the entered search values. The Percent (%) column is calculated as **Match % = (X/Y) * 100**, where:

- X = Number of fields that matched the person and any associated identities. A single field value matching identities only provides a single point.
- Y = Number of fields populated for the search

For example, a user enters search criteria of (1) Last Name, (2) First Name, (3) Gender, (4) State ID, and (5) Birth Date. **Y = 5**

The actual person record has two identities:

- First name matches on one identity (+1)
- Gender matches on two identities (+1)
- Last Name matches on two identities (+1)
- Birth Date matches on two identities (+1)
- State ID does not match on person (+0)

X = 1+1+1+1+0 = 4

Match = (4/5) * 100 = 80%

Ranking comes after match filtering. When the State ID and or Gender fields are used for searching, records that do not match are excluded from the list. For all other fields, results display as long as at least one of those field values match.

Once a student is selected from the search results, **the Identity Information fields - Last Name, First Name, Middle Name, Suffix, Gender, Birth Date and Social Security Number - cannot be modified**. These fields are READ ONLY and are not editable.

Student Locator

Search for a student already tracked in Campus using the fields provided. A minimum amount of data must be entered in order to search, you must enter the student's State ID, or full legal Last Name, First Name, and Gender. Hover the cursor over each field to see the data entry help.

Last Name	Name	State ID	Gender	Birth Date	%
Student	Student, Peter Paul	123456789	M	10/17/2005	100
	Student, Peter John	234567890	M	06/05/2003	100

Create a New Student

1. When the student is not found, click the **Create New Student** button.
2. When this creation is occurring in a State Edition state, a warning message displays indicating a new state ID is created for the student. Click **OK** to acknowledge this message.
3. A page that mimics the [Census Demographics](#) tool displays. Enter at least the required information.

See the [Student Locator Data Entry Fields](#) for definitions of the available fields.

A school must be selected in the Campus toolbar to create the student.

Student Locator Data Entry Fields

Included below are the accompanying fields that are available in the Query Wizard when building reports. These fields can be found when creating **Student Data Type** Filters in the following locations:

- Student > Demographics
- Student > Demographics > Identity History
- Student > Learner

Person Information Field Descriptions

Field	Description	Ad hoc Fields
Student Number	<p>Student's district identification number, used within school/district.</p> <p>Student Number Format System Preferences determine the behavior of this field.</p> <p>When the Student Number Format is set to No Auto Numbering, a user can enter a specific student ID number.</p> <p>When the Student Number Format is set to any of the other options:</p> <ul style="list-style-type: none"> When the person already exists in the database and is already assigned a Student Number, modification of that number is not possible (the field displays in gray text and edits cannot be made). When the person already exists in the database, but a Student Number is NOT assigned, red text displays indicating the number is Automatically Generated. 	student.studentNumber
State ID	<p>Student's identification number, as assigned by the state Department of Education.</p> <p>Generation of this field may depend on district/state System Preferences. Verify selections for the Student State ID Method. This is available for State Edition installations and State Edition linked District Editions.</p>	student.stateID
NASIS ID	<p>Only applicable for BIE users.</p> <p>New BIE students are automatically assigned a NASIS ID.</p>	student.otherID

Identity Information Field Descriptions

Protected Identity Information is available on the [Identities](#) tool.

Field	Description	Ad hoc Fields
Last Name	<p>The individual's last name.</p>	student.lastName

Field	Description	Ad hoc Fields
First Name	The individual's first name.	student.firstName
Middle Name	The individual's middle name.	student.middleName
Suffix	The generational assignment as part of his/her name (i.e., Jr, III).	student.suffix
Gender	The indication of whether the person is male, female, or non-binary. Gender options may vary by state.	student.Gender
Pronouns	The indication of the person's preferred pronouns. For additional information please refer to Pronoun Setup . When defined, pronouns are available in Pronoun drop lists throughout Campus.	ident.pronounID
Birth Date	Person's date of birth.	student.birthDate
Social Security Number	The Federally-assigned Social Security number (SSN). Please see additional information on Social Security Number Tool Rights .	student.ssn
Race/Ethnicity	Person's race/ethnicity determination. Please see additional information on the Race/Ethnicity tool.	student.raceEthnicityFed
Birth Country	Indicates in what country the person was born. This is a required entry for some states.	student.birthCountry
Birth State	Indicates in which state the person was born.	student.birthState
Date Entered US	Indicates the date the person moved to or entered the United States.	ident.dateEnteredUS
Date Entered US School	Indicates the date the person began attending school in the United States.	ident.dateEnteredUSSchool
Birth Verification	Proof of the person's existence, usually in the form of a birth certificate. Options may vary by state; the following are possible selections: <ul style="list-style-type: none"> • Birth Certificate • Attending Physician's Certificate • Permanent School Record • Family Bible • Parent Statement • Last Year's Attendance Register • Other Scholastic Record 	ident.birthVerification

Field	Description	Ad hoc Fields
Home Primary Language	Indicates the language most frequently and fluently spoken in the student's household.	student.homePrimaryLanguage
Nickname	Nickname preferred by person. <i>This field may not appear for all states.</i>	student.alias
Comments	Additional comments about the person.	ident.comments

Enrollment fields may vary by state. Please see the [Enrollments article](#) for more information about state-specific Enrollment fields.

Users who do not have calendar rights to the calendar in which they are enrolling a student are allowed to enroll the student; however, they are prevented from accessing any other Student Information tools during this process.

The same System Preferences are enforced when enrolling students from the Student Locator.

Field	Description	Ad hoc Fields
Calendar	Lists the name of the school and school year the student is enrolled.	student.calendarName
Schedule	Displays the schedule structure of the calendar into which the student is enrolled.	schedStructure.name
Grade	Indicates the grade level of the enrollment record. Grade levels should be mapped to state grade levels for proper reporting. When Grade Level Age settings are in effect, a warning message displays if a grade level is selected and the student is not of the appropriate age for the selected grade level.	student.grade activeEnrollment.grade
Class Rank Exclude	Indicates this enrollment record is not included in class rank calculations. This is often selected for foreign exchange students or special education students.	activeEnrollment.classRankExclude

Field	Description	Ad hoc Fields
Start Date	Lists the first day of instruction for this enrollment record.	student.startDate activeEnrollment.startDate
No Show	Indicates the student did not attend the school during the allotted time period determined by the district.	N/A
End Date	Lists the last day of instruction for this enrollment record.	student.endDate activeEnrollment.endDate
End Action	Indicates the selection of promoting, retaining or demoting a student to the next, previous or same grade level for the next school year. See the End Action section for more information.	activeEnrollment.endAction
Service Type	Indicates the type of enrollment and the intended service the student receives. Service types are Primary, Partial (Supplemental) or Special Education. When a student has multiple concurrent enrollments (an 8th grade student enrolled in the Middle School taking High School classes for part of the time), the Middle School enrollment would be marked as Primary and the High School enrollment would be marked as Partial.	student.serviceType activeEnrollment.serviceType
Local Start Status	Lists the local enrollment start code for the student. The mapped State Start Status code displays below this field.	activeEnrollment.startStatus
Local End Status	Lists the local enrollment end code for the student. The mapped State End Status code displays below this field	activeEnrollment.endStatus
Start Comments	Displays any comments about the start of the enrollment - who entered the enrollment, verified information, etc.	activeEnrollment.startComments
End Comments	Displays any comments about the end of the enrollment.	activeEnrollment.endComments

Logic exists upon saving the enrollment that verifies the correct Structure ID (visible on the

Schedule Structure Detail editor) is associated with the selected Calendar ID (visible on the Calendar Information editor).

When there is a mismatch, an error message displays indicating the two IDs do not match. When this occurs, the enrollment cannot be saved and Campus Support needs to be contacted to correct the issue.

Troubleshooting Errors

This section describes potential errors you may encounter when using the Student Locator.

No Response from State Server

When a state-linked (DIS-enabled) district has trouble connecting to the state database, the Student Locator only queries the district's local database when searching for and producing search results. When users encounter this error, an error displays (shown in the image below).

Users can still move forward in creating new students in their district, however, the record may not sync to the DIS-linked state edition or be assigned a State ID until the underlying DIS issues are resolved.

The district should report this issue to Campus via their authorized support contacts.

Student Locator

Student Search

Search for a student already tracked in Campus using the fields provided. A minimum amount of data must be entered in order to search. To search, you must enter the student's State ID, or full legal Last Name, First Name, and Gender. Hover the cursor over each field to see the data type.

Last Name	Name	State ID	Gender	Birth Date	%
Johnson	Johnson, [REDACTED]	[REDACTED]	F	05/27/2004	67

Last Name: johnson
First Name: [REDACTED]
Gender: Female ▾
Birth Date: [REDACTED]
Middle Name: [REDACTED]
SSN #: [REDACTED]
State ID: [REDACTED]
Search-->

[Create New Student >](#)

No Server Response Error

Advanced State Search Failed

When a state-linked (DIS-enabled) district has trouble connecting to the state, a warning message displays (shown in the image below).

Although this error message means first name synonym search results cannot be utilized at this time, you can still move forward in creating new students in your district. However, you should be extra vigilant in performing multiple searches using variations of a student's first name.

Districts should report this issue to Campus via their authorized support contacts.
