[Workflow of Treatments](#) | [Create Health Treatments](#)

Tool Search: Treatment List

The Treatment List is used to track the treatments that students receive when they visit the Health Office. This list is simply the name of the treatment and a code. This code can be a district-defined listing or based on state approved treatments.

The screenshot shows the 'Treatment List' tool interface. At the top, there are three buttons: 'Save' (green square with a white document icon), 'Delete' (green square with a white 'x' icon), and 'New' (green square with a white plus icon). Below these buttons is a table titled 'HealthTreatmentList Editor'. The table has two columns: 'Code' and 'Description'. The rows are as follows:

Code	Description
1	Handicapped
5	No Restrictn
8	In Wheel Chr
10	Nurse Action
11A	Nurse Assessment
12A	Nurse Monitoring
20	IHP
21	IHP/IEP
22	Emrg Plan
25	IV/30

Below the table is a section titled 'HealthTreatmentList Detail'. It contains two fields: '*Code' with the value '8' and '*Description' with the value 'In Wheel Chr'. There is also a checkbox labeled 'Active' which is checked.

Treatment List

See the [Health Administration Tool Rights](#) article for information about rights needed to use this tool.

Workflow of Treatments

After [Conditions](#) and Treatments are entered in System Administration, and Conditions are assigned to students on their Conditions tool, Treatments are assigned to those conditions. For students who receive treatments on a regular basis for ongoing conditions, treatment Health Office Visits can be scheduled. All active treatments for a student are available for selection on a Health Office Visit.

Create Health Treatments

1. Select the **New** button. The **Health Treatment List Detail** editor will appear below.
 2. Enter a code for the treatment within the **Code** field. This code can be a state code for a certain treatment, a district code, or a number that comes from a health dictionary. It can be alphanumeric up to 10 characters.
 3. Mark the **Active** checkbox to make the treatment available to link to conditions.
 4. Enter a description of the treatment in the **Description** field. This description can be up to 50 characters. It cannot contain special characters like quotation marks or question marks.
 5. Select the **Save** button when finished. The new treatment displays in the Health Treatment List table.
