

# Understand Data Certification

Last Modified on 03/11/2024 8:45 am CDT

Tool Search: Data Certification

Data Integrity Tools provide state and district users with the ability to certify and approve data certification events.

The following articles also describe high-level workflows of the data certification process:

- [Setup and Workflow \(District\)](#)
- [Setup and Workflow \(State\)](#)

**Data Certification tools are only available in State Editions of Campus and districts connected to a State Edition of Campus.**

## Available Tools

Tool	Description
<b>Setup</b>	<ul style="list-style-type: none"> <li>• <b>District:</b> This tool allows users to assign type memberships.</li> <li>• <b>State:</b> The Setup tool contains tabs used for establishing data certification types, memberships and events.</li> </ul>
<b>Certification Category</b>	<ul style="list-style-type: none"> <li>• <b>District:</b> This tool allows users to assign category memberships.</li> <li>• <b>State:</b> The tool contains is used for establishing certification categories and memberships.</li> </ul> <p>This tool consolidates the functionality of the existing Type and Type Membership tools; the existing tools will remain available until the Data Certification redesign is complete.</p>
<b>Event Certification (District Edition Only)</b>	The Event Certification tool is used to view and certify data certification events published from the state.
<b>Event Dashboard (State Edition Only)</b>	The Event Dashboard is used to manage data certification events. From here, users can check the status of events, approve district-certified events, request re-certification of an event and close events.

Tool	Description
<b>Snapshot Scheduler</b> (State Edition Only)	The Snapshot Scheduler tool is used to schedule data snapshots used for verifying data within data certification events.
<b>Event Report</b> (State Edition Only)	The Event Report displays state and district event status and user membership details for a data certification event.
